cz_binance. I received hundreds of messages through https://t.co/TEEwkPQFIa, which I find

incredibly helpful. However, many don't know how to communicate effectively with busy, impatient people like me. Here are some tips.

1. State your ask in the first sentence.

Start by clearly stating

cz_binance. @MatiBNB correct. Decentralized markets self-correct.

cz_binance. @1984_is_today Most exchanges I know hold crypto instead of fiat or stablecoins. Why hold fiat when you are in crypto?

cz_binance. @house_wing7135 I try with everyone, but can never reach a large number. Human's have limitations.

cz_binance. Our industry is in a messy state.

Lots of money chasing quick profits, wanting overnight 10x, 100x returns. When they can't find these, they complain.

On the other end of the spectrum, real builders feel left out. They can't achieve 10x overnight. Building real tangible value

cz_binance. @smylecooked I believe Binance will distribute directly to end users in the affected areas. Then it's up to them what they do with it.

Not a perfect system, but bypasses all middlemen, and direct to beneficiary.

cz_binance. Sent 1000 BNB for the donation for Myanmar and Thailand.

cz_binance. @BitfuryGeorge @BNBCHAIN What I learned is, typically: an image is given to 100 or 500 people to label, the results will be in a bell curve. Then you award people according to where they land on the bell curve. People near the end don't get anything. Bot prevention is a different aspect.

cz_binance. @Eljaboom @BNBCHAIN [100]

cz_binance. @ARafayGadit @BNBCHAIN It's so new that there isn't much literature. I have been trying to learn by talking to founders and developers in the space.

cz_binance. AI tagging (or AI data in general) is well fitted to be done on-chain. Harness low cost labor globally without geographic bias, (micro) pay them in crypto instantly. @BNBCHAIN Greenfield provides the storage capacity. More tooling still needs to be built. Let's build them.

cz_binance. Find our full response to the consultation below.

[arrow_right] https://t.co/v7j6hO3vQd

cz_binance. 5) We support introducing a Crypto Market Abuse Regime (MAR) to mitigate the risks and challenges specific to crypto.

The introduction of formal regulatory admission practices, alongside greater market surveillance and regulation in general, will help to reduce bad actors.

cz_binance. 4) Listings/delistings should be handled by exchanges, and exchanges should be held responsible for providing the correct information to consumers based on clear disclosure rules, and performing sufficient due diligence.

cz_binance. 2) In general, regulations should deliver against policy objectives while accounting for industry nuances. Not easy, but necessary, and something Binance is happy to help with.

3) A clear definition of DeFi is needed for both effective regulation and innovation.

cz_binance. 1) We believe that “same risk, same regulatory outcome” is the right approach to regulating emerging technologies.

It solves for the desired outcome rather than applying generic rules - capturing the intricacies of novel innovations, and their unique benefits/risks.

cz_binance. Effective regulatory frameworks must ensure financial stability and consumer protection, and act as a catalyst for innovation.

Based on this, some key points from our response below.

cz_binance. @Ashcryptoreal Thanks for the support. DM me a pic so that I can link you name with face. [pray]

cz_binance. @ZubyMusic awesome pic

cz_binance. @Ashcryptoreal #bitcoin > gold

cz_binance. @HULKGEMSCALLS @JesuslVivas @binance @BinanceES no, not really.

cz_binance. FUD doesn't just happen with western media. A couple of people were spreading FUD that they can get double deposits on Binance during the maintenance. It is not true. 4.

cz_binance. @GoingParabolic 4. It's resumed. read my tweets for more info on a system issue.

cz_binance. @HULKGEMSCALLS Thank you for the support and understanding.

cz_binance. @elxlee I don't know why people do that... [man_shrugging]

cz_binance. @TravelerKu I assume all is good now?

cz_binance. @CryptoKrush [man_shrugging]

cz_binance. @APompliano I am sure you read this. The book to read now is: Too Big to Fail. Closed door meetings during 2008 crisis, etc. Just what we are going through now.

cz_binance. You can cancel orders now. Trading resumes in 20 min, at 6PM Dubai time.

» Binance Temporary System Maintenance Complete (2023-03-24) | Binance Support https://t.co/orAYziTMyx

cz_binance. @LilMoonLambo resuming soon.

cz_binance. Est 60 min ish ETA. Our team's doing pre-trading tests now. For those new with us, our resume SOP is roughly as follows:

Announcement with exact times (soon).
Deposit enabled (done now).
Internal transfers enabled (done now).
30 min of cancel-only mode (not yet)
Resume trading

cz_binance. @CoinflipperA yeah, need to switch the bear engines out. [joy]

2022, no outage. 100% up time. Wrote that in the year end report. I knew it was going to change...

cz_binance. @cicibebelidon @__tbow__ There will be a period for ""cancel only"" before matching begins, usually 30 min.

cz_binance. Engine 1 is back online. Still need more time to do reconciliations, and for other engines to catch up.

We were a bit unlucky with this bug. Our engines take hourly snapshots. This bug happened 57 min in. So, replay/reconciliation takes a bit longer.

cz_binance. We communicate more frequently during issues.

Trading halts are P0 all-hands-on-deck issues. All internal meetings cancelled, for 8000+ people. Single focus until full recovery.

My main job is tweeting, while listening in on the dev call. No filter or proof-reads.

cz_binance. @etc_chmod [pray][+1]

cz_binance. @etc_chmod When the biggest exchange halts trading, prices won't move much. If it moves on smaller exchanges, when #Binance comes back, our deeper orderbook will bring the price back, causing those guys to lose money. Traders know this.

cz_binance. A little trivia while we wait. Debugging. In the 1940s, when ""chip"" circuits still use big transistors. Insects often get in (because it's warm) and short circuit things. Engineers have to periodically remove the bugs, thus debugging.

cz_binance. @__tbow__ The state of orders in the matching engine may affect available funds for

withdrawal in user accounts. Our withdraw logic checks with the matching engine for security.

cz_binance. @trading_peter Software bugs happen like that. Matching engines are sequential state machines. Previous orders affect future orders. If one order encounters a bug, the matching engine stops, for security reasons.

cz_binance. Initial analysis indicates matching engine encountered a bug on a trailing stop order (a weird one). Recovering. Est 30-120 min ish. Waiting for more precise ETA.

Deposits & withdrawals are paused as a SOP (standard operating procedure). Funds are #SAFU. [pray]

cz_binance. @canos that was for a different reason, just providing jobs for the youth.

cz_binance. @TayeSuave No.

cz_binance. @rosluund No, I don't have cash holdings.

Not a metal guy either. I travel too much. They are too heavy.

cz_binance. @DavidSacks interesting.

cz_binance. #Binance built an Customer Support Center in El Salvador from last year with about 60 staff already. Let's do more!

cz_binance. @trader1sz @SatoshiFlipper Guys, please don't be mean.

cz_binance. @PeterSchiff You are so close, but just lack that last tiny bit of introspection that *you* may be wrong about bitcoin. You tweet more about #bitcoin than most people. Let that sink in. [joy]

cz_binance. Earn, Savings, (or other names) are product names different platform may use. These may refer to one or any combination of the above. They don't always mean the same things, especially across different platforms.

Hope this helps. 5/5

cz_binance. Yield or APY (Annual Percentage Yield) usually refers to the interest rate on an annual basis. Not much to it here. 4/

cz_binance. Lending is when you lend your funds to someone else to get interest. You no longer maintain control of the funds. If that person/entity goes down, you lose your principal. Risk profile here is very different from staking. 3/

cz_binance. Staking refers to ""locking"" your coins on a blockchain to get rewards by helping with validating blocks. You maintain control of your funds (your keys). Staking rewards are usually governed at the protocol level, and are highly predictable. 2/

cz_binance. There are confusions between terms: lending, staking, yield, earn, savings, etc. There are subtle, but important differences. I usually understand/define them as the following. 1/5

cz_binance. The article tries hard to categorize Binance and FTX together, including the choice of the article title.

We are different. 4/9

cz_binance. Our users also must deposit to Binance first to be able to withdraw, which are also easily traceable on the blockchain. The article conveniently ignores the deposit transactions. 3/9

cz_binance. 4/ There are good (and bad) people everywhere. Embracing diversity and openness will lead to a better outcome. Any over-generalization (especially against others) is counter-productive and negative. Let’s guard against that.

cz_binance. 3/ Drawing a distinction between “on-shore” and everyone else is self-centered and somewhat arrogant. Everyone is ""on-shore"" from their own perspective. “We are better than everyone else” is not a panacea towards building a better industry.

cz_binance. 2/ Taking an “on-shore” perspective, the issue discussed, https://t.co/ysk3V0Zzra is an “on-shore” exchange. SBF and FTX’s key execs are Americans. They spent a considerable amount of their time and efforts lobbying in the US. This did not stop fraud from being committed.

cz_binance. The word ""offshore"".

@jespow uses the word “offshore” quite often. Here is my feedback.

The term “offshore” appears overly narrow-minded, self-centered, misses the broader picture and unhelpful to the development of our industry.

cz_binance. @ItsEasypop Now, I have more guesses for the reason(s) for this.

https://t.co/BvuqYj5P8j

cz_binance. 8/8 Given the ongoing regulatory uncertainty in certain markets, we will be reviewing other projects in those jurisdictions to ensure our users are insulated from any undue harm.

cz_binance. 7/ Binance will continue to support BUSD for the foreseeable future. We do foresee users migrating to other stablecoins over time. And we will make product adjustments accordingly. eg, move away from using BUSD as the main pair for trading, etc.

cz_binance. 6/ ""IF"" BUSD is ruled as a security by the courts, it will have profound impacts on how the crypto industry will develop (or not develop) in the jurisdictions where it is ruled as such.

cz_binance. 5/ On the alleged SEC vs Paxos lawsuit, I have no information about it, other than public news articles. The lawsuit is between the US SEC & Paxos.

I am not an expert on US laws. But personally, I agree with Mile’s logic here (not that it means much): https://t.co/b8H3bjLAoy

cz_binance. 4/ Paxos will continue to service the product, and manage redemptions.

Paxos also assured us the funds are #SAFU, and fully covered by reserves in their banks, with their reserves audited many times by various audit firms already.

cz_binance. 3/ As a result, BUSD market cap will only decrease over time.

cz_binance. 2/ We were informed by Paxos they have been directed to cease minting new BUSD by the New York Department of Financial Services (NYDFS).

Paxos is regulated by NYDFS.

BUSD is a stablecoin wholly owned and managed by Paxos.

cz_binance. #BUSD. A thread. 1/8

In summary, BUSD is issued and redeemed by Paxos. And funds are #SAFU!

cz_binance. @milesdeutscher BUSD, even though called Binance USD, is NOT issued or redeemed by Binance.

cz_binance. @TajoCrypto He is.

cz_binance. @Crypto_bn @binance same question, lol...

cz_binance. On to more #BinanceBuild.

cz_binance. We've also doubled down on trust & safety, growing our security team by 500%, publishing proof of reserves, and topping up our SAFU fund.

cz_binance. We partnered with top academic institutions globally with a core focus on Africa.

Last week, Binance Charity awarded 12-month, intensive tech education scholarships to 1000 youth from 19 African countries.

https://t.co/TzkdWdNdqP

cz_binance. As well as this: Binance Charity is funding 30,665 scholarships to study Web3 in 2023.

In 2022, we raised $3.5 million that provided over 290,000 hours of Web3 education and training courses.

cz_binance. #Binance is working with relevant parties globally to reach these goals.

E.g. On education: @BinanceAcademy is a one-stop online crypto education hub.

We've brought courses offline to universities around the world, and launched Learn and Earn - incentivized crypto learning.

cz_binance. For example, @FATFNews travel rule to mitigate illicit finance + stronger CEX commitment to safety

- Clear and sensible tax framework for crypto
- Pilots & sandboxes to further explore the benefits e.g. financial inclusion, innovation

cz_binance. The paper also makes policy recommendations for countries to accelerate adoption, enable innovation and mitigate risks that I'd like to highlight:

- Invest in infrastructure, payments systems and education, especially financial literacy
- Fast implementation of global standards

cz_binance. Stablecoins are already being used today for disbursing aid.

@mercycorps and Binance Charity piloted a stablecoin token pegged to the Ugandan shilling for faster and cheaper cash transfers to 2200 refugees & microentrepreneurs in South Sudan & Uganda.

cz_binance. The paper highlights crypto's unique benefits and use-cases in Africa & developing markets, such as:

- Facilitating cross-border trade
- Lowering remittance costs in line with the UN SDG of 3%
- Hedge against inflation
- Funding channel for critical causes: e.g. biodiversity

cz_binance. .@UNDP recently published a paper on the emerging applications of crypto in Africa and the evolving regulatory landscape.

It's great to see the policy debate in Africa progressing, and I'm proud to see @BinanceBCF's work mentioned [thread]

https://t.co/6hxwrNT5kR

cz_binance. Side note, I also loved his DOT system. Will implement that in Binance too. Always so much to learn from Ray. 5/5

cz_binance. He is skeptical about about #bitcoin mainly because it's movements have little to do with anything and has been shown to not be a good inflation hedge. He believes an inflation hedged stablecoin may be the way to go. 4/5

cz_binance. Have I managed to get Ray into crypto? Not yet. I have been busy learning from him, and there is just so much to learn. Ray is an extremely humble guy. He understands money better than anyone. Yet he often humbly says he doesn't understand enough about crypto. 3/5

cz_binance. After meeting Ray. He gave me a few tips. Write down the decisions you make and why you made them. So, a few months later, I published my principles blog. Ray unblocked my writer's block. I am still working on version 2. 2/5
https://t.co/p9BoR4npm4

cz_binance. I had the great honor of meeting Ray Dalio a few times in the past year. I read all of his books before I met him. I even tried to write down my own principles. But it was just so hard to extract principles and write them down. I was stuck on page 1. Thread 1/5.

cz_binance. Security and user-safety have always been priorities for #Binance.

cz_binance. Stablecoins are in strong regulatory focus at the moment.

We look forward to the proposals by @FinStbBoard and @MAS_sg.

Read our response to the FSB consultation here: https://t.co/E4KWC0BvOG

cz_binance. We are already seeing many benefits and use-cases for stablecoins:

Cross-border payments, hedging against inflation and even aid disbursement.

Regulation will bring much needed certainty to issuers, users and service providers, as well as accelerating adoption.

cz_binance. Requirements for 1:1 backing and redemption at par, which we fully support.

#BUSD is pegged to the USD, and available for redemption, at a ratio of 1:1.

It is issued in partnership with Paxos and approved by NYDFS.

cz_binance. Consideration of an alternative approach to local incorporation for enforcing regulatory and supervisory requirements, such as mitigation measures, subject to further evaluation.

cz_binance. A more defined scope for regulated activities, specifically governance, issuance,

stabilization arrangements, and wallets - including access and holdings management.

cz_binance. Adoption of a risk-based approach to decide which stablecoins are in scope, aiming to mitigate risk to monetary & financial systems - thus starting with fiat-backed.

cz_binance. @WhaleChart We are here. https://t.co/mmPp2uZeCC

cz_binance. User protection and market integrity are enhanced when lawmakers and regulators expand the scope of permissible activities.

We have seen this in many other industries: tradfi, health care, pharma, internet, content, etc.

cz_binance. 4) Stablecoins are a key tool for store of value among many use cases, and should be regulated to harness their potential and ensure market integrity.

cz_binance. 2) Crypto asset service providers should be licensed, registered, and authorised. Licensing and authorization criteria should be well defined.

3) Entities carrying out multiple functions should be subject to additional regulatory, transparency and/or disclosure requirements.

cz_binance. Some highlights from the article above that support this stance:

1) Our industry needs robust, comprehensive, and globally consistent crypto regulation that is fit for its cross-border nature. For a global approach to work, it must adapt to the changing industry landscape.

cz_binance. I have said this before and will say it again: the best form of user protection is globally consistent, risk-based regulation.

Outright bans will just lead to users operating in the shadows, at their own risk, and without any safety net.

We are not perfect. We welcome feedback, but ignore FUD. We focus on building our own products with your support. [pray][pray][pray]

Merry Christmas![christmas_tree]

cz_binance. 9/ Size. Writing about ""Binance"" gets you more clicks. If you write about a small exchange, you get less clicks. Size has pros and cons. [joy]

cz_binance. 8/ There may be a tiny number of people who are jealous, or just plain racist against Chinese-looking Canadians. Who knows? We don’t care. [man_shrugging]

cz_binance. 7/ And then there are generalizations. “If one CEX is bad, then all other CEXs must be bad too.” Especially if they liked a CEX before, who later turned out to be bad. Then, they must hate the other CEXs with a stronger vengeance.

cz_binance. I personally hold the opposite view, of course. I think the best way to protect banks from disruption is to let them adopt blockchain technologies as early as possible. Again, I could be wrong here.

cz_binance. 6/ Same goes for politicians, policy makers, etc. Not all of them are cutting-edge progressive. Being conservative is not wrong. I have met leaders who want to “protect” their banks instead of “disrupting” them with crypto.

cz_binance. 5/ Crypto have not reached mass adoption yet, probably less than 5% globally. Many people are still skeptical about crypto. Some media have readerships that are more traditional, and will tend to align with their views. Nothing wrong with that.

cz_binance. 4/ Per above, some media gets paid to FUD us. Some are entirely “owned” by a ""competitor"". Some may wrongly think that we cut off their funding sources (we didn’t, they failed on their own), and blame us, regardless of how illegitimate their funding sources may have been.

cz_binance. 3/ Some industry players view @Binance as competition. We have seen some go to extraordinary lengths to lobby against us, or loaning sums of money to small media that’s worth many times the media outlet's market value, including buying their CEOs houses, etc.

cz_binance. eg, a user who can’t access Binance for a while because his own router had issues may be hard to diagnose or prove, even though no one else had problems during that time and our system monitoring shows no queues, no overload on traffic, and no spike in CS cases.

cz_binance. 2/ Some lose money on trading or experience other issues may blame and attack us. Not all cases have black-and-white right-or-wrongs.

cz_binance. Typo: 1/9 [wink]

Some in our industry hate centralization. Regardless if a CEX helps with crypto adoption at a faster rate, they just hate CEX. Everyone is allowed to hold their views and voice their opinions. Nothing wrong with that.

cz_binance. Why do people FUD about @Binance?

A few (non-exhaustive) reasons. Thread 1/98

cz_binance. @fabled_sleuth @SimonDixonTwitt @VoyagerUCC @Kirkland_Ellis FUD.

cz_binance. @shingolavine @SimonDixonTwitt answer in the original thread.

cz_binance. @SimonDixonTwitt @VoyagerUCC @Kirkland_Ellis You mean, other than FTX bidding $1.4 billion for it (most likely because FTX wanted to delay the $530m loan repayment FTX owed to Voyager)?

cz_binance. @web345678910 And how to get that to your loved one when your are ""no longer around"".

cz_binance. @BitninjaX It's call a brain wallet.

It doesn't handle inheritance, making sure your loved ones can get it when you are not around. But guess it's not a requirement for everyone.

And humans forget over time.

cz_binance. @calebBilli10 @BitfuryGeorge There is Uniswap or Pancake Swap.

cz_binance. @ercwl @inversebrah [joy]

cz_binance. @BitfuryGeorge I tweeted a few times in the past.

Binance is not a profit maximizing organization. As such, we are also not a shareholder value maximizing organization.

But we are consistently profitable, barely but sufficiently.

cz_binance. You see this on Twitter sometimes, right? Well, our interns made it easier for you... Keep building.

cz_binance. @BitfuryGeorge Not that profitable [joy], but stayed profitable since month 4 of our

cz_binance. @CryptoAlerts365 Good advice for me now.

cz_binance. @tier10k @ImChrisChampion I have always wondered if we ever did something wrong to piss off The Block, as they were harsh on us for no apparent reason. It all makes sense now.

cz_binance. @Siopers12 @coinmamba We just discussed this internally. We may block all 3Comma access if they don't have good ways to fix API key leaks in their side.

cz_binance. @coinmamba We have more than 20 people investigating. I now have knowledge of the size of your loss, Ip address, etc. Honestly, this is not a case for compensation. Social influence won't change that. We treat all users equally. Ensuring your api key is secure is important. [pray]

cz_binance. @gr8_dane_crypto @SBF_FTX I know. [joy]

cz_binance. @JohnWRichKid @SBF_FTX Yeah, I think I will [sweat_smile]

cz_binance. @SBF_FTX Don't try to tell your friends to focus on us. Focus on yourself. You should have learned that by now. 2/2

cz_binance. @SBF_FTX Sam, not that it matters now. You also can't force us to sell if we don't want to. Also, we have the veto right to block any further fundraising you were doing. Never used or mentioned it. It was never a competition or fight. No one won. 1/2

cz_binance. @coinmamba @Benny8180182 We have a lot of guys investigating, not always that easy or fast. We don't know who owns the Ip addresses.

cz_binance. @coinmamba Mamba, there is almost no way for us to be sure users didn't steal their own API keys. The trades were done using API keys you created. Otherwise we will just be paying for users to lose their API keys. Hope you understand.

cz_binance. @OZ40415138 @kevinolearytv click on the last one you see...[joy]

cz_binance. 11/11 If @kevinolearytv is looking for someone to blame for the implosion of FTX, he should start by wagging his finger at his investment partner, Sam, and then perhaps at the man in the mirror.

cz_binance. 9/ You don't have to be a genius to know something don't smell right at FTX. They were 1/10th our size, yet outspent us 100/1 on marketing & ""partnerships"", fancy parties in the Bahamas, trips across the globe, and mansions for all of their senior staff (and his parents).

cz_binance. 8/ My ethnicity was a focus of those attacks and @kevinolearytv signaled his intention to continue those attacks in the media and will likely repeat them at next week's Senate hearing. I'm Canadian and Binance is not a Chinese company.

cz_binance. 7/ Shortly after that Sam began "investing" in friends in high places – from media, to policymakers, to celebrities (like Kevin). And he used that network to manipulate public opinion, including attacking me and others in the industry.

cz_binance. 6/ Sam was so unhinged when we decided to pull out as an investor that he launched a series of offensive tirades at multiple Binance team members, including threatening to go to "extraordinary lengths to make us pay" – we still have those text messages.

cz_binance. 5/ Unlike @kevinolearytv we continue to do due diligence even after we make an investment. As an early investor in FTX, we became increasingly uncomfortable with Alameda/SBF and initiated the exit process more than 1.5 years ago.

cz_binance. 4/ Worse than losing $15M, you'd think that being used as the poster child for one of the greatest financial crimes in history would make @kevinolearytv think twice before taking Sam at his word AGAIN. But clearly not, based on his appearance on https://t.co/hoyHqjdUk3

cz_binance. 3/ On top of that, FTX spent money on Miami Stadium, multiple Super Bowl ads, baseball referees, F1, not to mention massive political donations and luxury real-estate. Oh, and reprehensible misuse of customer funds.

cz_binance. 2/ We exited FTX 1.5 years ago in July 2021.

Since then, FTX invested in a myriad of companies, totaling to $5.5+ billion, including but not limited to:

Source: https://t.co/gdmQgNWVqN https://t.co/e02DchO5VE

cz_binance. It seems $15m not only changed @kevinolearytv's mind about crypto, it also made him align with a fraudster. Is he seriously defending SBF?

cz_binance. @coinmamba We have seen multiple cases related to 3Commas. They claim those users were phished. Did you ever login to ""3commas"" through a link you received?

cz_binance. 5. “SBF vs CZ: The Epic Showdown”

We don't focus on competitors because it's a waste of time and resources when the industry has only touched 6% of the population. We want multiple exchanges, multiple blockchains, multiple wallets, etc, to co-exist in the ecosystem.

cz_binance. 4.2 SBF perpetuated a narrative painting me and other people as the “bad guys”. It was critical in maintaining the fantasy that he was a “hero.” SBF is one of the greatest fraudsters in history, he is also a master manipulator when it comes to media and key opinion leaders.

cz_binance. Also welcome other industry players with cash who wants to co-invest.

Crypto is not going away. We are still here. Let's rebuild.

2/2

cz_binance. To reduce further cascading negative effects of FTX, Binance is forming an industry recovery fund, to help projects who are otherwise strong, but in a liquidity crisis. More details to

cz_binance. Carlos confirmed the unrecognized orders were due to his API key leakage. He only has one active API key and it was used on Skyrex, a crypto trading bot platform. We will try to disable all API keys that was used by Skyrex, figuring out how to identify them now.

cz_binance. We seen at least 3 cases of users who shared their API key with 3rd party platforms (Skyrex and 3commas), and seen unexpected trading on their accounts. If you used such a platform before, I highly recommend you to delete your API keys just to be safe. [pray]

cz_binance. @CarlosOMFG @binance Did you share your API key with Skyrex or 3commas, or some other 3rd party platform? If you did, remove those immediately. Our CS agent have spoken with you, right?

cz_binance. @ASvanevik To my knowledge, we haven't launched the feature yet. Still in dev. Where did you see this? [joy]

cz_binance. @VitalikButerin Agree with the thread until the ""issuing a coin part"". If you are making a donation, use a top 10 existing coin. Issuing a coin causes all kinds of problems. Is it for your own benefit (coins you hold) or charity? Not to mention the liquidity issues, inflated valuations, etc...

cz_binance. @WisdomMatic There are many other good players in the industry.

cz_binance. There is a lot to cover and will take some time. This is a highly dynamic situation, and we are assessing the situation in real time. Binance has the discretion to pull out from the deal at any time. We expect FTT to be highly volatile in the coming days as things develop.

cz_binance. This afternoon, FTX asked for our help. There is a significant liquidity crunch. To protect users, we signed a non-binding LOI, intending to fully acquire https://t.co/BGtFlCmLXB and help cover the liquidity crunch. We will be conducting a full DD in the coming days.

cz_binance. @milesdeutscher Keep building.

cz_binance. @JesuslVivas @Eljaboom We are simple people. [pray]

cz_binance. @Cryptoking [pray]

cz_binance. @RenoCzarr @cryptoBala01 A simple solution is to keep displaying the original one as a thread or quoted tweet.

cz_binance. @cryptoBala01 I still don't see any edit button. think it is only available in some countries. The roll out is so slow. What's the worst that could happen to an edit button?

cz_binance. @BTC_hat The addresses are public. https://t.co/vxtvHTyZ5c

cz_binance. @DeFi_Made_Here It's all user funds.

cz_binance. @TheDustyBC These are not our money. They are user assets. We are just the custodian.

cz_binance. @tier10k I didn't say that. It was a question, not a commitment. I think we will stay in the free market.

We still hold LUNA (now LUNC) today. [joy]

cz_binance. @hunutu107 @theData_Nerd @GenesisTrading @FTX_Official @AlamedaResearch @SBF_FTX [man_shrugging] that's not us.

cz_binance. @tier10k They have or will buy $580m of #BNB?

cz_binance. Funny memes, media & some people tried to color this as a “fight.” Sorry to disappoint, but I spend my energy building, not fighting. Today I spent my day on our business & our community. I suggest others do the same. Back to building. 4/4

cz_binance. The fact that it sparked such levels of ""discussions"" was surprising. There were also conspiracy theories that I somehow orchestrated this whole thing. If you read this thread, you would appreciate that no one can orchestrate this. 3/4 https://t.co/CV2QwC7Umr

cz_binance. Everyone wants more transparency in our industry, right? My tweets were simple. There were questions about a large ($580m) FTT deposit to Binance, and we were transparent about the fact that we are closing our FTT position. 2/4

cz_binance. We asked our team or mods to put a message below it each time they see it, to explain it. Not a good design.

cz_binance. @Genius_Crypto_ Yup

cz_binance. @cryptomanran You are way smarter than me, bro. I don’t think that much. [joy]

cz_binance. @Cryptoking Not locked. We usually just hold. It removes any doubt that we would attack a “competitor”. Not financially sensible. We want the industry to grow together. But there is a

limit to hold, lol.

cz_binance. @themazuma Man, I was not in shape back then.

cz_binance. We typically hold tokens for the long term. And we have held on to this token for this long. We stay transparent with our actions. 4/4

cz_binance. Binance always encourages collaboration between industry players. Regarding any speculation as to whether this is a move against a competitor, it is not. Our industry is in it’s nascency and every time a project publicly fails it hurts every user and every platform. 3/4

cz_binance. We will try to do so in a way that minimizes market impact. Due to market conditions and limited liquidity, we expect this will take a few months to complete. 2/4

cz_binance. I made a mistake on #ETH in 2015. I told Vitalik a turning complete language on a blockchain is too big of a bite to chew. He won't make it. Obviously, I was mistaken. 3/4

cz_binance. In June 2017, Vitalik argued that the #BNB price would go to infinity with a discount on fees. I said no, it's limited by the number of people who wants it.

He made a mistake there. 2/4

cz_binance. While on this topic, here is a photo from Jun 16, 2017, two days after we decided to do the #BNB ICO. The whitepaper wasn't finished yet. Vitalik was not an advisor. We each made a mistake that I can recount. 1/4 https://t.co/rS0gQQSpHb

cz_binance. 6, We want to help solve problems. Eliminating bots is at the top of my wishlist. Pay for blue ticks, pay to comment is the right way to go (I will donate all my proceeds to charity). And, of course, the long-awaited eidt button.

cz_binance. 5, Twitter is a platform I use heavily. As the saying goes, invest in the products you use. (Not financial advice)

cz_binance. 4, we are happy to help with Web3 integration, if needed. Everyone needs liquidity. We are the largest provider of liquidity.

cz_binance. 3, we believe Twitter has tremendous untapped value. Twitter has not had a proper business model yet. We believe Elon and crypto can help unlock innovative business models that do not involve selling user data. Welcome to Web3!

cz_binance. 2, we support entrepreneurs. Elon is a strong entrepreneur. With Elon at the helm, we believe Twitter will continue to grow and become an impactful platform for everyone.

cz_binance. 1.1 regardless of short-term stock price fluctuations, market conditions, etc. It’s a long-term investment in the cause. Free speech is a prerequisite for having freedom of money, which we are building for.

cz_binance. 1, we support free speech. Twitter is the global Townsquare. From singers/athletes/ movie stars to politicians/CEOs/entrepreneurs, the crypto community and us little guys, Twitter gives us our voice. This alone is enough for us to invest ...

cz_binance. @ProCryptoBTC @CryptoAlerts365 @binance This is 3rd-party content. Not by Binance. Like tweets you see are not Twitter's opinions.

cz_binance. @spideycyp_155 @binance @BinanceBCF @BNBCHAIN Do you have link to the podcast? I haven't seen the final version. [laughing]

cz_binance. @CryptoAlerts365 @binance Was kinda expected, though. People are curious, and they think ""he must be running Twitter"" which I don't. [joy]

cz_binance. @binance Grid trading limits were asked. I didn't have the answer then. Just asked our team:

""We are working on a new infrastructure which can allow more limits for grid trading. Hopefully, that will be implemented in 2-3 months.""

cz_binance. This way we can be fair to all users. The trading experience and liquidity remain the same, and Binance can still contribute to the supply decrease of LUNC, which is what the community wants.

cz_binance. Instead, we have decided to begin burning all trading fees collected on the LUNC/BUSD and LUNC/USDT spot and margin trading pairs on Binance.

Fees will be converted to LUNC then sent to the burn address. The burn is paid at our expense, not the users'.

cz_binance. Three things here:

1) The LUNC community wasn't happy with this approach.
2) It's going to take a while to develop.
3) It's not going to work anyway. Our traders won't vote for it.

Since then, we were discussing a better, quicker way to support the community.

cz_binance. Since my AMA on Friday, we've had a number of discussions about how Binance can better support the LUNC community's requests for TX tax burns.

The last thing I said was we will implement an opt-in button. This has since changed. 'Old' blog for reference.

cz_binance. A small few: if you don’t force 1.2% tax on all your users, u r centralized/greedy.

cz_binance. Finally, the focus on catalyzing payments innovation is part and parcel to the evolution of the financial services industry at large, and brings into focus the kind of impact it can have on financial inclusion especially for low and moderate income (LMI) communities. (8/9)

cz_binance. Ensuring sustainable growth of the global crypto ecosystem also involves doing our

part to strengthen international financial crime and counter-terrorism efforts. We are always expanding our in-house anti-money laundering (AML) detection and analytics capabilities. (7/9)

cz_binance. We commend the US framework's focus on consumer protection, fraud, and illicit activity as a critical part of future regulations. We have grown our compliance team by 500% and launched law enforcement training worldwide to scale our support. (6/9)

cz_binance. Binance is working to comply with future regional regs, such as MICA in the EU, and looks forward to consistent regulations globally to ensure the industry can continue to thrive and support regulators to meet their objectives. (5/9)

cz_binance. The framework brings specific provisions for international cooperation with other countries and active collaboration with global standard setters and the private sector - especially on the enforcement front. (4/9)

cz_binance. @KChargecat @Bloomberg first time hearing jitters.

cz_binance. I then asked a few VIP traders, they all knew. You can't hide bad behavior.

cz_binance. Just learned a new word, jitters. On 1 particular exchange, sometimes your orders will be stuck for a bit, and a few other orders will get in front of you. Apparently, this happens often enough on this exchange that the traders coined a term for it, jitters. (Front running) [no_entry_sign]

cz_binance. @cake_era And people think I am busy...

cz_binance. @cake_era oh, nice! A few days ago, I was trying to catch the 6,666,666, but couldn't do it.

cz_binance. @ph_pleb I was in Malta at the time, visiting the authorities, lol...

cz_binance. @spideycyp_155 You'd hope, lol...

cz_binance. Three days later, The Block changed the title from “raided by police” to “visit by authorities”.

Facts.

6/6

cz_binance. 3 years ago, The Block, ran an article saying the Binance office was “raided by the police”. The article was copied by other sites, and spread very quickly on social media. A lot of clicks.

#BNB dropped from $24 to $18 that day, erasing $400m or so in market cap.

5/6

cz_binance. #BNB price dropped from $310 to $301 in minutes, but have since bounced back.

Now, the original article is removed. Many copies of it are still available on other sites.

4/6

cz_binance. Even with the hilarious reference to “room full of BNB” which obviously shows it is fake news. But given it was 163, the news was picked up and mirrored by many other news sites in CN, and quickly spread in many social media groups.
3/6

cz_binance. Original text:

□□□□□□□□□□FBI□□□□□□□□□□□□□□□□□□□□□□□□□□□□□□□□BNB□BUSD□

2/6

cz_binance. A thread on this FUD today. 163, a major news site in China, ran a story that Google translates to:

“Changpeng Zhao, the founder of Binance, was arrested in the mansion during the FBI raid, and a room of BNB and BUSD was found in the basement of the mansion.” 1/6

cz_binance. @selenaroyf Sadly, it doesn't work in China.

cz_binance. @RonnyCrypt0 Don't think they ever had any left...

cz_binance. @TokunboAdesina No inflation in #bitcoin. Deflation in #BNB.

cz_binance. @TajoCrypto There are a dozen guys with BNB tats now. I lost track. But yes, this one is mine, haha...

More capacity to think about the few important stuff.

cz_binance. Not owning things frees your mind, the most expensive/limited resource you have.

cz_binance. @FeraSY1 I don't want to make product recommendations. But I recommend researching what Google, Apple, Microsoft use. I don't know/remember which specific providers they use. There are a few secure ones.

cz_binance. They use GoDaddy for DNS, which is insecure. No web3 projects should use that. Very susceptible to social engineering.

cz_binance. @AltCryptoGems wow.

cz_binance. @BinanceEvavvvva When I met Samy a few months ago, he said I was the 3rd person he met in real life from Binance, after working for 2.5 years. Binance members spend way more time together in the ""meta verse"" than in real life. haha... [joy]

cz_binance. @CryptoAlerts365 I know, I know...

cz_binance. @antepliyarasa Still some distance to catch up with ETH. Need to grow the BNB developer community.

cz_binance. @PanwarMina Not us fighting. ED investigating WazirX. We only want to help.

cz_binance. I did not speak to this person... https://t.co/52vsemj6WU

cz_binance. Fact: we asked for transferring of WazirX system source code, deployment, operations, as recently as Feb this year. This was refused by WazirX. Binance do NOT have control on their systems.

WazirX has been uncooperative with us, and looks like uncooperative with ED as well.

cz_binance. People playing deception wording games. We can shut down the domain. It just hurts users. We do NOT have control of the trading system. You just gave the AWS login, no source code, no deployment capability. You also retained access to the AWS account, source code, deploy, etc.

cz_binance. @Eljaboom [pray]

cz_binance. @CryptooAdy Not sure who, but I think it came at a time when ETH gas fees were $10 per transfer.

cz_binance. @AltCryptoGems [wink]

cz_binance. @WallSt_Cowboy @DarshitBadani @NischalShetty @binance Let's not let one failed case affect our opinion on a population.

cz_binance. @sohaibeth @DarshitBadani @NischalShetty @binance I won't argue with that now.

cz_binance. @DarshitBadani @NischalShetty @binance Each time we pushed, we got a tiny bit of movement. The domain name change, the AWS account, etc. It took years. We were still hoping it would close. So, it's not clear how much of it we can/should disclose. There are NDAs in place.

cz_binance. If you have funds on WazirX, you should transfer it to Binance. Simple as that.

We could disable WazirX wallets on a tech level, but we can't/won't do that. And as much debates as we are enduring, we can't/won't hurt users. [pray]

cz_binance. @DarshitBadani @NischalShetty @binance It is. You sign an agreement, then there is a transfer process after that. Technology transfer, legal change of control, etc. Those unfortunately did not happen in this case. We have been pushing for it for 3 years, it just was never done.

cz_binance. The WazirX founding team maintained control of the operations of the platform. We (Binance) were never give data or control of users, KYC, etc. We would love to work with ED to fix these issues in WazirX.

cz_binance. It hurts users.

Binance does NOT have control on operations including ""user sign-up, KYC, trading and initiating withdrawals"", as stated earlier. WazirX's founding team controls that. This was never transferred, despite our requests. The deal was never closed. No share xfers.

cz_binance. Sad that these have to be debated on Twitter:

Binance provides wallet services for WazirX.
WazirX domain is transferred to our control.
We were given a shared access to an AWS account.

We could shutdown WazirX. But we can't, because.. 1/2

cz_binance. @ARafayGadit We have been trying to conclude the deal for the past few years, but it hasn't. ""a few"" issues. Not easy to disclose.

cz_binance. 4/ Recent allegations about the operation of WazirX and how the platform is managed by Zanmai Labs are of deep concern to Binance. Binance collaborates with law enforcement agencies all around the world. We would be happy to work with ED in any way possible.

cz_binance. 3/ Binance only provides wallet services for WazirX as a tech solution. There is also integration using off-chain tx, to save on network fees. WazirX is responsible all other aspects of the WazirX exchange, including user sign-up, KYC, trading and initiating withdrawals.

cz_binance. 2/ On 21 Nov 2019, Binance published a blog post that it had “acquired” WazirX. This transaction was never completed. Binance has never - at any point - owned any shares of Zanmai Labs, the entity operating WazirX.

cz_binance. Quick thread on Binance and WazirX, and some incorrect reporting.

Binance does not own any equity in Zanmai Labs, the entity operating WazirX and established by the original founders.

cz_binance. None of the Audius hacked funds came to @Binance so far. We will keep monitoring. Stay #SAFU

cz_binance. Large liquidity also offers better prices for users. Tighter spread. Lower slippage. This is also a very important form of Consumer Protection. Real financial impact for users.

#Binance has the largest liquidity by far, globally. The best user protection mechanism.

5/5

cz_binance. 4/ Another misunderstanding people sometimes have: on an exchange, users don’t choose a counterparty. They just trade with the orderbook. You can think of the orderbook as a broker.

cz_binance. 3/ There will be arbitrage traders trying to bring the prices to balance, but they are not nearly as efficient as one orderbook. And they make money in between (which is paid by the consumers).

cz_binance. 2/ Imagine if we divided the liquidity by 180 countries. It will make it 180x easier for large traders to swing the markets, and significantly increase the volatility.

cz_binance. From our interactions, some countries want a segregated orderbook (liquidity). This is a BAD IDEA for a number of reasons.

Large liquidity is one of the best Consumer Protection mechanisms. It protects against market manipulation, volatility, and reduces liquidations.

cz_binance. @antoinenic That's a valid point. Companies should offer offices for people who wants to work in one. #Binance does this.

cz_binance. @1GoblinRich Micro manage to make people feel attached is just so wrong...

Don't hire, or fire those guys.

People sharing your mission & values have much stronger attachment.

People feel attached working with others who produce results, even or especially remotely. They appreciate it.

cz_binance. @cryptodinosaudi @elonmusk Factories are different. You can't remotely work on the assembly line. [joy]

cz_binance. @little_long If you can't manage your health when given the freedom, working in an office is unlikely to fix it.

cz_binance. We are no longer in the industrial age. Hire people you trust, then trust them. Work smart, work remote! 9/9

cz_binance. Time zone coverage, obvious. Also, when you don’t force people to sit in an office from 9-6, they are more willing to take that 11PM (or 1AM) call with their colleagues in a different location. The list goes on, but you get the idea. 8/

cz_binance. Remote workers waste no commute time. Less tired. Less sweaty. More time to do real work. Remote workers can take a break when they are tired, like taking a nap, and wake up energized. 7/

cz_binance. Remote work allows you to hire talent globally, no matter their location. Not all top talents are willing to move to a different country or city. 6/

cz_binance. Remote work allows your slackers to slack off, which is a GOOD thing. Why? It makes them more visible. After a period of time, they will have no results. And you can bottom them out. 5/

cz_binance. We all know 1 hr of high quality work is more than 10 hrs of ""just in the office"". Today, we measure results, not hours worked. Remote work forces you to do this as you can't manage the hours worked. 4/

cz_binance. In an office, you can micro manage them, which is bad. You can see them banging on the keyboard, but does not equal work? They may be chatting with their friends, etc. Micro management kills creativity. 3/

cz_binance. In person communication is better if you can have it. But at a certain size, you have to have regional teams. For web3 projects, most are global, having local teams is a must. Be close to your users. Remote work can't be avoided. 2/

cz_binance. I am baffled that we still force people to work in an office, especially for intellectual jobs such as web3, blockchain, etc. Here are some of the pros and cons of office vs remote work. 1/9

cz_binance. There’s a significant opportunity to work with our industry peers to develop consistent implementation standards around the world.

cz_binance. The proposals above are looking better than earlier versions from a financial freedom, privacy, and financial inclusion perspective.

This signifies good direction for the industry as a whole, and demonstrates effective collaboration between crypto businesses and policy makers.

cz_binance. But what does this progress mean for the industry, Binance and for you?

Broadly speaking, the trends here are encouraging. The industry has been longing for regulatory clarity, and these recent developments show we’re moving in the right direction.

cz_binance. Banks vs crypto has been raging since Satoshi published the Bitcoin whitepaper in 2008.

The reality is banks provide a critical role in the crypto ecosystem. We need them to keep driving adoption, which is why we support their increasing involvement in the development of crypto.

cz_binance. Based on the requirements, likely only a small number of crypto assets will qualify. Regardless, legitimizing banks’ holding of crypto assets is a step in the right direction. This is progress.

cz_binance. 4/ So, it's a lot of work to bring you 0 fee trading. We won't have to do all these work if you don't want it. Let's see what the poll say. We listen to our users. [wink]

cz_binance. 3/ What if people still do it? Detection kicks in. No normal person trades with themselves. Those who do can easily be detected.

They could use multiple accounts. We have AI detection for that too. Not easy to implement, but we got some of the best AI talents already.

cz_binance. 2/ Why would people do wash trading? Let's remove those incentives.

Volume based VIP tiers is one. So, we removed trading volume of the 0-fee pairs from VIP tier calculations.

This makes VIP tiers harder to reach. No problem, we will adjust those too.

cz_binance. 5/5 Protect users.

cz_binance. 4/ Now the important part.

To lead by example on PROTECTING USERS, Binance will let this go and ask the Terra project team to compensate the retails users first, Binance last, if ever.

Binance (after a 5 min discussion) fully support this proposal. [point_down]

https://t.co/QnMx8aZ09A

cz_binance. 3/ On this same address, we have about $12,000,000 UST from staking over time (not bought). Also never moved or sold.

cz_binance. 2/ Binance received 15,000,000 LUNA (at peak worth $1.6 billion USD, now not much) as part of the original ($3m) invest. 560x return at peak. It still sits on the address we received at [point_down]. Never moved or sold.

Address:
https://t.co/6HwTu6CCuB

cz_binance. 1/5. Some interesting updates, full transparency and lead to protect users:

cz_binance. I did ask about the rumored ""2nd round investments or UST"". There were discussions, never closed.

Binance did not buy UST.

cz_binance. We probably do have some from trading fees. Probably valued close to 0 now. (Think of it as free trading in the past, haha). This just wasn't on my mind. Not how we prioritize things. Users first. [pray]

cz_binance. 8/ I am just hoping that the project teams can rise from the ashes and rebuild in a

proper and sensible way. Regardless of my personal views, or the solution chosen in the end, we will always be here to support the community in any way we can.

cz_binance. 7/ I am not always right, but my perspective is: Failures can/will happen. But when they do, transparency, speedy communication and owning responsibility to the community is extremely important.

cz_binance. 6/ In this regard, I would like to see more transparency from them. Much more! Including specific on-chain transactions (txids) of all the funds. Relying on 3rd party analysis is not sufficient or accurate. This is the first thing that should have happened.

cz_binance. 5/ The last few days, we tried hard to support the Terra community. In my tweets, I am simply pointing out the potential issues from my understanding. Minting, forking, don't create value. Buying back, burning does, but requires funds. Funds that the project team may not have.

cz_binance. 4/ Binance Labs invested in hundreds of projects over the last 4 years, including exchange "competitors" and many "competing" blockchains. A few of them have fallen by the wayside, but a few have been extremely successful. That's how investments work.

cz_binance. 3/ Binance did not participate in the 2nd round of Luna's fund raising nor did we acquire any UST.

Binance Labs invested $3m USD in Terra (the layer 0 blockchain) in 2018. UST came much later after our initial investment.

cz_binance. 2/ First, I need to address falsehoods circulating in crypto twitter.

cz_binance. @TajoCrypto That was my question through this whole time.

cz_binance. @ARafayGadit Do they really think they can fork BTC at the snapshot on Nov 18, 2021, and the new fork will have the new BTC at $68,000 (the price on that day)?

cz_binance. I don't hold UST, never had. And I don't know it too well. Usually busy with other things, but now dragged into this.

cz_binance. @Crypto_bn Many users still wish to convert to a different asset instead of withdrawal directly.

cz_binance. @Cryptoyon We honestly were hoping they had a plan to recover. it usually takes a few days to see that, like even in Axie Infinity's case.

cz_binance. @alirezajaffari4 Not an easy call. Imagine we halt trading, and the price is still moving on other exchanges, what would the users who want to sell say? Should it be -95% or -90% or -80%?

cz_binance. @Asem_Alqudah Their network is not producing blocks. No transfers possible.

cz_binance. 7. We know there are different opinions in the community, we felt suspending trading is the best way to protect our users at this time. We will continue to monitor the situation closely 24/7. All actions will be announced on @binance. [pray] - CZ

cz_binance. 6. (This is in sharp contrast to Axie Infinity, where the team took accountability, had a plan, and were communicating with us proactively. And we helped.)

cz_binance. 5. I am very disappointed with how this UST/LUNA incident was handled (or not handled) by the Terra team. We requested their team to restore the network, burn the extra minted LUNA, and recover the UST peg. So far, we have not gotten any positive response, or much response at all

cz_binance. 4. While #Binance always aims to be neutral, helpful and protective of all users and industry peers, and we typically refrain from commenting on other projects, I will break that rule this time.

cz_binance. 3. Some of our users, unaware of the large amounts of newly minted LUNA outside the exchange, started to buy LUNA again, without understanding that as soon as deposits are allowed, the price will likely crash further. Due to these significant risks, we suspended trading.

cz_binance. 2. An exponential amount of new LUNA were minted due to flaws in the design of the Terra protocol. Their validators have suspended their entire network, resulting in no deposits or withdrawals possible to or from any exchange.

cz_binance. 1. At #Binance we prioritize user protection. We made the decision to suspend LUNA and UST trading. Here's why.

Glad we turned on $HKD support on @binance just a few days ago.

cz_binance. Some people don’t get it, but some do. Lunch @TimDraper?

cz_binance. [joy] @justinsuntron? he knows how to sell that bitcoin? Or we can consider that’s “burned”?

Nice effort, but you can only take a horse to water...

This is why I rarely try to convince anyone. Their choice.

Crypto doesn’t have to be used by everyone. My grandma never used USD.

cz_binance. $1 dollar 9 years ago.

If someone told you then, it will be $9000 in 9 years time, and people will still call it a bear market, would you think those people are crazy?

cz_binance. Now even Lisa Simpson knows #Bitcoin.

cz_binance. History may not predict the future, and correlation does not prove causation.

Here are just 2 charts around the previous #bitcoin halving. Watch what happens AFTER halving. Markets are inefficient, at least, historically.

cz_binance. BREAKING: Nothing has changed in Malta, for Binance or any other crypto exchanges. No licenses were granted to anyone by Malta, as of yet.

Some media, even crypto media, has such a bad habit of releasing misleading news that only hurts their own credibility and our industry.

cz_binance. Will take just a little longer. Probably another 20-30 min to live cancellations. The last 1% always take more than 1% of the time. Thank you for your support!

cz_binance. In final steps of restoring systems. ETA 20 minutes to start allowing cancellations, and live trading 30 min after that. Exact time may still vary a bit, wait for official announcement, coming soon.

cz_binance. There people spreading FUD now. You can safely block them now, or when we come back online.

You want up-to-date info. But you definitely want to block negativity/FUD out of your life. It will have a positive impact on your finances and quality of life.

cz_binance. Unscheduled system maintenance. Trading paused. Working on it.

cz_binance. Do you want to run a crypto exchange?

Let us take care of the boring stuff (tech, product, liquidity) for you.

cz_binance. Writing a detailed report on some of the perf issues we face in the last few days. Will publish in 24h or so. It's not the first time @Binance faced challenges, and it won't be the last time we solve them. We are humbled to have the heaviest traffic in crypto, and your support![pray]

cz_binance. #Bitcoin does a healthy retrace, suddenly everyone in #crypto is a scammer. [joy]

What’s the yield YTD?

cz_binance. Happy Valentines Day! https://t.co/R0CWQ4OFto

cz_binance. Parts of the system are still struggling to keep up with the high traffic. Given so many updates per day, not all parts of the system has been live tested under this load.

I guess the good news is: there is very high SUSTAINED demand.

Working on it, all hands on deck. [pray][pray][pray]

cz_binance. #Bitcoin doesn't exist anywhere, not in your wallet, not in your computer, not in a vault.

What exists is just a record of all transactions, from which you can calculate how many btc you have.

Very tricky to explain. And how do you ""ban"" something that don't exist?

Very interesting. Meetups in the hot areas coming.

cz_binance. If you wish to say no to inflation, what do you do?

#buyBitcoin #buyBNB

cz_binance. From @Binance_DEX to @binance.

Which project will be next?

cz_binance. How long from now do you think we will see $btc back at $20,000 again?

cz_binance. Stable coin is the worst misnomers in crypto. There is nothing stable about it.

While 1 btc still = 1 btc, ""stablecoins"" have dropped by 3x in value against btc in the last 6 months.

If you still like it, we just launched our #BGBP on @BinanceJE. [pray]

cz_binance. If I asked in January, BTC will hit $10,000 and $BNB will hit $29 by June, how would you feel? Most will say they would feel ecstatic. So, let's be that way.

cz_binance. @APompliano If they used crypto, we would be at least 6.5x larger...

cz_binance. #BNB is available for margin now. But I don't recommend shorting it, as you will get #REKT.

cz_binance. Move your coins to @Binance from anywhere and enjoy hassle-free staking rewards.

And if you do it this month, you get almost a years worth of rewards. Are you moving those $XLM now?

cz_binance. So basically, congressmen are: bullish on bitcoin, just not so hot on Libra.

Feeling pitiful for the guys who sold yesterday.

cz_binance. #BinanceTurns2 today!

cz_binance. @producerknoidea @binance Sleep on it again?

cz_binance. Feel free to print as much as you need, as I am already all in crypto.

cz_binance. Imagine if a crypto company owned this ship... What would the ""news"" be?

cz_binance. #Singapore leading the way in Asia. Big financial hub of tomorrow.

https://t.co/oo5Wfe8Vj8

cz_binance. Decreasing total supply! #BNB

cz_binance. What's wrong with CCN these days? Bad bad article. So many wrong facts. Binance Singapore and Jersey all recently listed ETH. @binance also added ETH pairs recently. https://t.co/uWFBSJvG7R

cz_binance. I have been waiting to travel the world, with #bnb.

Dreams come true when you #buidl.

cz_binance. If you liked the doge listing, raise your hand. [raised_hand]

You will also like the next few moves from us.

cz_binance. This one is an exception, as there isn't much new tech development (I guess it was never about the tech for this one). The users/community is large, and a famous ""ex-CEO"" (cough @elonmusk) helps!

Enjoy!

cz_binance. .@binance has 1M followers now. Thank you for your support! [pray]1M x https://t.co/2m9X4vb0LC

cz_binance. Were you shaken out?

cz_binance. Never met or spoke with @bgarlinghouse, but same goals! [handshake][handshake][handshake]

cz_binance. Thanks to everyone for attending the super meetup. First time doing a 1000 people meetup, and in flip-flops. [pray][pray][pray] https://t.co/1GEGnJYrZA

cz_binance. This one is too easy.

cz_binance. Lol, who is the jerk here?

A guy who builds what he believes in?

Or

A guy who goes to crypto conferences just to call bitcoin a scam?

cz_binance. Wished @WarrenBuffett was here.

cz_binance. If you took a selfie with me, please tweet @ me, so that I have a copy too. That's what selfies are for, right?

cz_binance. Wrong mentality still. I have sold all my fiat years ago. And only convert what fiat I need to spend for the next month.

cz_binance. Bitcoin rallies, ""damn, I wish I bought in earlier""

A dip, ""omg, it's all crushing to 0, let me get out. ""

Rallies again. ""damn, i wish I bought that dip""

A dip, ""omg, it's crushing again, let me get out""

...

cz_binance. .@binance will actively block any stolen funds coming our way.

The key is fast reporting (victim) and real-time blocking (exchanges). To this end, we developed an anti-fraud system just for this. Will make it available to all real soon, free of charge. #SAFU

cz_binance. This transaction: cost $0.015 USD in fees, took 1.1 seconds, and $1.2 BILLION in value transferred.

The future is here.

cz_binance. While #bitcoin is on a tear on price, @Binance have rolled out Binance 2.0, with margin access to everyone.

In bear and bull markets, we #BUIDL! https://t.co/N2aA7vSWxF

cz_binance. Every crypto project that's still alive should do an AMA this month, if you haven't already, yes June. Time to get going.

cz_binance. $BTC alone is $200B market cap now. I remember a few days ago, the entire crypto market cap was like $100B.

Bitcoin is pulling its weight, we need to follow the lead, people! https://t.co/VSRUwUqgjx

cz_binance. @DoveyWan We are hiring, but not those guys.

We only hire passionate people.

cz_binance. Throwback to #2YearsAgoToday, we started the #Binance ICO, on our own brand new site. #Over9000 people rushed in on Day 1. Thank you for your support!

(Dug up a screenshot from my archives. BNB was called BNC back then.) https://t.co/qN15dVBb9G

cz_binance. We had our first Margin liquidation today. Guess what, it was on a #BTC short.

Don't bet against bitcoin, and don't bet again b...

cz_binance. I read a headline saying ""bitcoin crashes to $10300!"" I am like WTF? Oh it's a nocoiner media.

cz_binance. How many return to ATH of $btc have you seen? Other than the digits being different, the community reaction is so similar, everytime.

cz_binance. The more it is ""banned"", the more people want it. https://t.co/weOVZGCaz3

cz_binance. Whoever said Libra was bad for #crypto? Let's get everyone in first.

cz_binance. https://t.co/k52SBc91pS

cz_binance. If you want to talk to me, you better show me you own some #bnb.

No more excuses.

cz_binance. I see many rules being made that on first glance seems to be against #crypto, but clearly by people who don't understand crypto at all, and thus don't consider the secondary effects, all of which actually will only accelerates crypto #adoption.

cz_binance. 300B, and we are still here.

cz_binance. Opens the door to another 1.37 billion people. #usebnb #buybnb

cz_binance. @LindellSaint @binance Bookmarked

cz_binance. Very smart move from KuCoin to support #BinanceChain and $BNB.
1. Access to many strong projects already (and will be) on Binance Chain.
2. Attract BNB traders and holders, especially users we had not been able to service.

cz_binance. Facebook should accept $BTC (and $BNB of course) alone side $Libra in the WhatsApp, Messenger, Facebook, and Instagram apps. ""Can't and must not work"" won't be possible for bitcoin. It's already working.

cz_binance. Binance Research Report - First Look: Libra - An in-depth review of Facebook's long-anticipated entry into cryptocurrency https://t.co/s4xlGDHVPb

cz_binance. Today, one of the largest organizations, one with 2 billion population (1/3 of the world's population), released their #crypto coin.

What are you doing with your organization?

cz_binance. Facebook Libra coin don't need KYC. They have so much more data on the 2 billion people. Not just name, id, address, phone number. They know your family, friends, real-time/ historic location, what you like... They know you more than yourself. And now your wallet too. Best AML!

cz_binance. It's over 9000! https://t.co/vauQtRzWeL

cz_binance. There will be a transfer of 9001 BTC soon, no need to FUD. It's for a good thing, details to follow. Waiting for whale_alert.

cz_binance. #BNBeer https://t.co/tYljG83HQ0

cz_binance. Over 9000! https://t.co/Z1kWmmgLXG

cz_binance. Happy Fathers Day! Let's work together to increase the freedom of money for our sons, the future fathers. [family_man_boy_boy]

cz_binance. And this time, it's not just $btc. Many other blockchains that were just concepts in 2017 have materialized and have real transactions and volumes. Onwards. #altszn

cz_binance. Almost forgot, 2 years ago today, I messaged my team after a ""crypto"" hotpot dinner:

""We will do an ICO. Google it if you don't know what the word means. And let's start to write our white paper, now.""

cz_binance. Because of some stupid (sorry for the strong word) media, I foresee I have to explain at least another 1000 times that a website is not a blockchain, even to @VitalikButerin. A website is a client to use the blockchain, but it is not the blockchain itself. A DEX can't be blocked.

cz_binance. A TA guy goes ""we may finally be over with the bear market..."", in my head, ""if you said that at $3100...""

cz_binance. $BNB price went up, so @Binance_DEX fees adjust down.

cz_binance. Better to disrupt yourself than waiting to be disrupted. Good job, Visa!

Not a small plastic card company.

https://t.co/KrlZurv8pn

cz_binance. Congratulations $FTM. The first project to go from @Binance_DEX to @binance. First of many!

cz_binance. That Bill in India will really push privacy coin adoption forward.

cz_binance. Herkese sevdikleriyle birlikte nice mutlu ve güzel bayramlar.[candy][candy][tr][tr] #binanceramazan #binanceturkiye

cz_binance. Lastly, very smart move for @justinsuntron, now the whole traditional financial industry has eyes on #crypto (and $TRX of course). Who is this #crypto kid? Kudos for pushing adoption, Justin! [open_hands][+1][clap]

cz_binance. .@justinsuntron kindly invited me to go, but I can't make it. Too far. I guess that's like turning down $1,000,000, assuming 5 guys going, lol... But very much appreciated.

I would totally recommend inviting @APompliano.

Couple other thoughts:

cz_binance. 8 years ago, $BTC price was $8.499. What's the % increase today? https://t.co/wdM6E62alt

cz_binance. @riskbutcalm Lunch with me is free.

cz_binance. @cryptokrider @binance We ignore crap.

cz_binance. @khokhar_ahmad @binance @coinbase You should try the postal service for email.

cz_binance. Do business with intelligence, energy and above all integrity. The world is your partner.

cz_binance. Had some system performance bottlenecks, trading saw some delays, fixed now. Withdrawals also saw some delays, fixed as well, but there is a backlog will take another 15 minute to drain.

Seeing ATH in system traffic, by far!

cz_binance. Pure coincidence. Careful what you wish for in #crypto.

cz_binance. When (not if) btc breaks from that 8000...

cz_binance. accidentally, lol.

cz_binance. Who's paying attention here?

cz_binance. Not a small company, not a small user base. It's spreading...

cz_binance. 11. Finally, luckily for today’s entrepreneurs now, there are other options available now. Welcome to blockchain based fundraising.

cz_binance. 1/10 A few points. Most of you may not know the final outcome of my dispute with Sequoia, but it is public now. In summary, the arbitration tribunal dismissed all of Sequoia's claims.

cz_binance. We are seeing much higher order volumes (number of orders) than Dec 2017/Jan 2018 (the peak).

Trade (not order) volume in USD is 1/3 of the peak, but BTC price is 1/3 and ETH price is only 1/5 of the last peak, most other main alt prices are even lower.

cz_binance. Heavy load affecting some users. Fixing.

cz_binance. Lesson learned, invest in pizza shops that accepts #crypto.

cz_binance. .@Binance will convert all the ERC20 $BNB tokens in our hot & cold wallets to native BEP2 tokens. To achieve this, all the ERC20 BNB tokens in our hot & cold wallets will be burned and equal amounts of BEP2 tokens will be sent from the creator address to our new BNB cold wallet[arrow_down]

cz_binance. Withdrawals are open for most tokens, the balance will be open shortly.

A new requirement to be logged in while confirming the withdrawal mail was added. It caused a small conflict while using the app so it will be rolled back shortly.

cz_binance. Welcome home.

cz_binance. Withdrawals will be enabled soon. Some final tests, just making sure this upgrade is fully operational.

cz_binance. Autoscaling due to load spike. Will stabilize soon.

cz_binance. First and foremost, giving $1,200,000 equivalent in $bnb back as a thank you for standing by us, also one level up for all VIPs.

cz_binance. You can cancel orders now. Trading, placing new orders & deposits resumes in 30 min or so. Withdrawals will follow shortly after that. Thank you for your support in this tough week. A detailed recap will follow. [pray]

cz_binance. Started trading test now. No need to FUD. These trades are just for test purposes.

cz_binance. A few tasks took a bit longer, still doing final bits testing, will over run by 2 hours or so. Almost there. Your understanding is much appreciated. [pray][pray][pray]

cz_binance. 2 HR update: upgrade is on track so far.

cz_binance. @RussellOkung Welcome to @binance

cz_binance. And it's all Bitcoin's fault, again!

cz_binance. @whale_alert Damn, great idea, thanks! Have to follow you now. If you do this for all other previous hacks, this is such a strong feature that everyone have to follow you. And you are providing an invaluable service in fighting bad players in the space. Social monitoring!

cz_binance. Final stretch, 11PM Tuesday, EST + a few hours. Thank you for patience, cooperation and support so far! [pray][pray][pray]

cz_binance. Aiming for Tuesday, not sure if it is Asian or pacific time yet. Working on it.

cz_binance. The team is doing another all nighter. I check Twitter once every couple hours, or when my team tells me to retweet something. Pushing forward, and making progress, and some big changes. Thank you for your patience during this tough times! [pray][pray][pray]

cz_binance. @cryptomanran dude... don't know how to reply without sounding arrogant. we got it. will just leave it at that.

cz_binance. @CryptoVanessa @binance We are aiming for early part of next week, better safe than sorry this time. Please bare with us. Your understanding is much appreciated. [pray][pray][pray]

cz_binance. @APompliano I hope it is a popular opinion. [joy]

Thanks for the support, as always! [pray][pray][pray]

cz_binance. We have restored limits to 5x (500%). Sorry about the troubles, had to be overly

cautious with everything.

cz_binance. Again, we will be moving some ERC20 USDT to a new cold wallet. No need to FUD. Funds are #SAFU.

cz_binance. Wait, what?

BTC $6094.80 as of this writing.

cz_binance. @officialmcafee [handshake][handshake][handshake] Would love to pick your brain about it. Will DM you and arrange a time.

cz_binance. I must also thank our supporters. They won't fit in an FF. I will grow my follow list a bit after this, but still will not be able cover a small %. But thank you! [pray][pray][pray]

cz_binance. I would like to thank all the peer exchanges, wallets, security/analytic teams and other service providers for responding to us and helping us in need, and blocking transactions of fraud funds. Together, we are stronger. Will be a big FF this Friday!

cz_binance. More importantly, the team is progressing with real work. I had to urge/force them to take sleeps here and there. Back to work.

cz_binance. evaluating a suggested option is wrong in itself, especially under the circumstances. And under all circumstance, freedom of thought is not a crime.
3. we did not want to do it.
4. we couldn't do it.

Bitcoin is secure. Onwards, lots to do...

cz_binance. It turns out the re-org discussion is hotter than the incident itself. And becoming a little twisted.

1. we did not initiate the idea. It came from a suggestion from Jeremy (quoted tweet)
2. we did discuss it. Many people seems to deem even that itself is wrong. I don't think

cz_binance. @CryptoDonAlt We have enough BTC to cover.

cz_binance. cons: 4 While it is a very expensive lesson for us, it is nevertheless a lesson. it was our responsibility to safe guard user funds.

We should own up it. We will learn and improve.

As always, thank you for your support!

cz_binance. cons: 1 we may damage credibility of BTC, 2 we may cause a split in both the bitcoin network and community. Both of these damages seems to out-weight $40m revenge. 3 the hackers did demonstrate certain weak points in our design and user confusion, that was not

obvious before.

cz_binance. Also thanks to @coinbase and many other exchanges (again, can't list everyone) pledging to block deposits from those addresses. Much appreciated!

Also much appreciate the ""unitedness"" of our industry to fight hackers and fraud.

cz_binance. Also would like to say thanks to $QKC and a whole lot of other partners (sorry, can't list everything here) pledging support to us. We don't need the funds now. Our charity efforts will continue, please consider to donate to those, maybe after we pass this bump.

cz_binance. Not the best of days, but we will stay transparent. Thank you for your support!

https://t.co/Y1CQOatEpi

cz_binance. Have to perform some unscheduled server maintenance that will impact deposits and withdrawals for a couple hours. No need to FUD. Funds are #safu.

cz_binance. I will personally donate $10,000 equivalent in BNB to start it off. Once we raise a sufficient amount, I believe the law suits will stop automatically.

Let the positive #crypto force win.

cz_binance. Clarification: @Binance_DEX is not trying to compete with any other blockchain or DEX; it's trying to compete with @Binance.

cz_binance. did you get shaken off or did you #HODL?

cz_binance. @CryptosBatman @binance @Binance_DEX Careful what you wish for.

cz_binance. Space exploration shall be funded globally using #crypto. Investors shall have their names inked on the blockchain.

cz_binance. SpaceXcoin @elonmusk

cz_binance. In a few years, there will be more users in #crypto than there are users for internet today.

cz_binance. We will be moving USDT funds to a new cold wallet address. One large transaction

coming. Funds are #SAFU.

cz_binance. Let's use the crowd intelligence again. What are the benefits for a central bank to issue a stable coin? To themselves and to users?

cz_binance. Here is a project that refused to even talk to an exchange about listing (and we have a good relationship with their tech guys), but we list it anyway.

Good tech wins!

cz_binance. Twitter is deceiving.

1. A tweet on 3 major milestones achieved in one week, 366 likes.

Blocking bad ""news"" is a key factor to successful trading, I hear.

cz_binance. Thanks for the coverage.

One minor correction: on @Binance_DEX, there are no ""deposits and withdrawals"", you trade directly from your wallet. ""Exchanges/network"" never have custody of your funds. You like it better this way?

cz_binance. Just burned 5mm ERC20 BNB, commencing swap to the real #BNB.

cz_binance. Happening this week:

1. @binance Launchpad @maticnetwork sale
2. Binance Singapore exchange launch
3. @Binance_DEX public launch and #BNB mainnet swap

#BUIDL

cz_binance. warming up!

@Binance_DEX

cz_binance. I like the positivity for #bnb [pray][pray][pray], but we really don't have to diss any other coin. #eth can do much more than #bnb in features. Let's grow together. [handshake][handshake][handshake]

cz_binance. But... at least, they are so consistent, it's becoming a reliable indicator. lol

cz_binance. Do you want to help those who speak your language to adopt crypto?

cz_binance. Happy Easter!

cz_binance. Everyone will be in #crypto. I just hope they issue this token on @Binance_DEX, will take them a few seconds instead of years of development. lol https://t.co/0j23jZVHII

cz_binance. @JohnyQi @PeterMcCormack @JohanDXB @CalvinAyre No need to worry in this case, if anyone can send you 1 btc from a Satoshi address, I'd be honored to cover the 250k for ya.

cz_binance. @justinsuntron @binance thanks!

cz_binance. faster transactions (1 seconds confirmations, with no rollback possible), plus lower fees, should do it. Not to mention a native DEX built in.

cz_binance. Wow, really? Got a flood of congratulation messages, thanks! Feels like Dec 2017 again. But let's keep our heads down and keep #buidling. That's the only thing we know how to do, in bear and bull markets.

cz_binance. Reading the comments, please understand Charity is not exclusive, or obligatory. Feel free to choose the program you wish to donate to.

If we can push crypto to the last mile of Cathedral building, it's the ultimate #adoption.

Bring crypto to religion!

cz_binance. There are plenty of other exchanges out there. We don't make decisions for other exchanges. Our decision is part of the natural selection process, so is yours. We are just a small part of the community, who are super supportive of our decision.

cz_binance. Everyone can make their own decisions. Everyone has influence. Even you, if you sold a coin you don't like (theoretically, it does affect the price, no matter how small), is that centralization? At what level does it stop being centralization? Who decides that level?

cz_binance. Everyone will be in crypto.

cz_binance. Oh. @jespow will do it. I have a feeling... #crypto industry is tighter and stronger you think.

cz_binance. Do the right thing.

cz_binance. Lastly, anyone who supports BSV from a tech perspective should be attacking the fraudulent Craig Wright, who is poisoning YOUR community, and not attack the rest of the world.

Anyone thinking CW is Satoshi should read about how a private key works, ie, learn about crypto.

cz_binance. The real Satoshi can digitally sign any message to prove it. This is as simple as breathing for him/her. And we have the pub key.

Until then, everyone is Satoshi, except Craig Wright!

cz_binance. thank you for your support![fire][fire][fire]

Which side are you on?

cz_binance. @JacobCanfield unblocked. I do aggressively block a rather large number of scammers, annoying/distracting/negative, etc, but also a lot of mistakes in the process, sorry.

cz_binance. @JamesMcDowallCX The problem for most people is, you have to front the legal costs, which can mount to millions of dollars. Fortunately, we can deal with it.

One of the key problem with most legal systems around the world today.

cz_binance. @JamesMcDowallCX oh, and it won't be the first time, and we learned a few things. The losers pay for our lawyer fees. We have a number of very good/expensive lawyers.

cz_binance. @MustacheTommy I normally don't like get involved in debates, pick sides, etc. But this is going too far.

I also didn't like the fact that the fork caused BTC to drop below $6k, which caused pain to many in the industry.

cz_binance. Craig Wright is not Satoshi.

Anymore of this sh!t, we delist!

Adoption, slowly but surely.

cz_binance. #Crypto will increase more than 1000x (against fiat) simply due to the printing alone...

cz_binance. I find it interesting most non-bitcoiners thinks bitcoin's started at $20,000, with statements like 85% drop, etc, lol.

What price did you buy your first BTC at?

https://t.co/wmHmujTU90

cz_binance. I think even if you look at ATH, it will be a similar graph. A drop in one year is normal in trading markets. Look at any yearly stock chart.

cz_binance. If you knew in 2016, that BTC price will be $4000 in 2019, would you call 2019 a bear market? And what would you have done back then?

cz_binance. Although everyone will be in crypto, some get it, some don't.

@jack gets it.

cz_binance. Failsafe, just in case if you don't get along with your future boss, @binance is hiring too. Won't be reporting to me, but we can pay in BTC or #BNB. Please apply on Binance homepage. https://t.co/EtPD2bFzOK

cz_binance. Happy Saint Patrick's Day! https://t.co/enzXARWjbj

cz_binance. How I use Twitter

I seek and provide positive energy
I block negativity/annoyance
I be myself, a normal guy, nothing fancy
I interact with our supportive community
I retweet when you shill @binance
I shill #BNB once in a while

I thank my 300k followers. https://t.co/V7iuTfRYkK

cz_binance. $4k & 300k

There are tough days, and there are good days. We are always here.

cz_binance. A life spent on building is far richer than a life spent on criticising others.

I feel bad for those poor guys who don't get this. Rich/poor is less about money (well a little bit), but more about fulfillment and happiness.

Live long and prosper!

cz_binance. my team corrected me that now 1 #BNB can support a child for more than a month now, given the recent rise in price. lol...

Feeling good.

cz_binance. It's not the lunch, it's the education!

Would you donate 1 #BNB, to help a child in Africa for 1 month?

cz_binance. @JacobCanfield @MustacheTommy @justinsuntron @VitalikButerin bad bad bad... sneaky/slimy way to get fans for yourself. And don't pit on guy against another. Just a bad thing to do.

both are people who work hard to help grow the industry. Let's help them both, and help each other.

cz_binance. @elonmusk @rallyqt Need a little investment? Happy to contribute some, in #BNB.

cz_binance. The #XRP army should be happy about this. Someone called me the ""leader of the XRP Army"" during my live AMA, lol...

https://t.co/JqKNxmh1FP

cz_binance. Everyone will be in crypto, whether they know it or not. Let's not fight the inevitable, and welcome them. https://t.co/TFe9zPnbnc

cz_binance. 15 minutes to resume trading https://t.co/rzVlSXfoay

cz_binance. Progress. Slowly but surely.

What can't be stopped will spread!

cz_binance. Today marks 8 years since the March 11, 2011 earthquake and tsunami that devastated East Japan. Yahoo makes an annual donation to recovery efforts for every Yahoo search of ""3.11"" on their engine. If you have a second, please do a quick search!

cz_binance. The world's first live property auction using cryptocurrency streaming. Accepting Bitcoin & Binance Coin #useBNB https://t.co/pt4ULhkSOC

cz_binance. Big upgrade. Funds are #SAFU.

cz_binance. Popular/unpopular opinion: Everyone will be in crypto, sooner or later, whether they

know it or not, whether you like it or not.

cz_binance. Not everyone uses USD, yet it has value. We don't need everyone to use bitcoin for it to have value.

cz_binance. Unpopular opinion: JPM/FB coins.

In a decentralized world, anyone can do as they please (within limits, so long as they don't hurt others). The more people adopt #crypto, the better.

Adoption is #adoption. Welcome!

How well will they do? Well, let's wait and see.

cz_binance. Guess where we will have a new fiat-to-crypto exchange?[sunglasses]

cz_binance. Welcome to the club, lol!

cz_binance. Thank you!

As a CEO, it is my duty to promote $BNB. I owe it to our hodlers. And I like to interact with our $BNB supporters. Nothing wrong with that, I hope. If you don't like it, easier to click Unfollow (on all of us), than asking us to change for you. Good luck!

cz_binance. @fle_pie What am suppose to do? Stop twitter? No, definitely not. I am just a regular guy, and a hard working one at that.

cz_binance. Argentina government 1:1 match our investments for blockchain projects. Kudos to Argentina! Adoption!

cz_binance. Bear or bull, just gotta keep building! Thanks @Forbes. https://t.co/yHIPyHPPrl

cz_binance. it's spreading.

cz_binance. @theanimalxrp @netscr1be @coinbase @ToastWallet @binance @wirexapp I guess they are new to #XRP. Those are not lost. It's just a matter of manually crediting back to the user. Pain in the neck, but no funds are lost. I have a feeling this tweet will help you get your #XRP back.

cz_binance. https://t.co/ou1qSPrrQO

cz_binance. I guess he wants to buy some crypto.

cz_binance. adoption of one coin is good for the rest of us too. Go @SatoshiLite

cz_binance. Don't pitch me projects. All ideas sound good, show me the execution!

cz_binance. @afsheen_jafry @lalokano1 @mysticaloaks @Eljaboom @crypt0snews @CryptoEuclid @APompliano @l3l2ucelee @Lis_xrp @CryptoBrekkie It's simple my friend, as I answered in a few podcasts recently, one of the best ways to identify projects with value is the user base. Xrp got that.

The market votes with their feet, not decentralization idealism.

Increase your user base, increase adoption.

cz_binance. Like to think we contributed to the adoption, maybe just a tiny bit, lol. Congratulations #XRP!

The more adoption, the better, and the faster thing move around the world. It's spreading.

cz_binance. We seen ATH for trading system load about an hour ago, some users experienced ui delays during system auto scaling. Still improving.

cz_binance. Disagree on this one. Humans can use crypto equally well.

The reason it is so hard for many to understand cryptocurrency is because our schools don't teach us what money really is.

cz_binance. ₿inance, is pronounced ₿uy-nance.

cz_binance. A few guys seem to be bent out of shape, take it easy. Don’t call it a DEX. Call it an exchange where users control their own funds, runs on a fast blockchain maintained by a number of nodes, plus a fast and easy UI. That’s it.

cz_binance. @elonmusk @coindesk I still don’t have much of a Tesla, let’s trade some?

cz_binance. Is it just me? Or are we getting more excited at 4K than 20k?

Nothing wrong with that, makes total sense.

Just not used to so many messages on Twitter all of a sudden, it’s been a while.

cz_binance. 1 day till the @binance_dex testnet release!

cz_binance. 3 books I recommended on Pomp's podcast.

https://t.co/ZbrkvkfnGR

https://t.co/WpuQHd5H8S

https://t.co/LktiXo6JK5

These books help you understand how our world works (or doesn’t work). This understanding is

essential for success.

cz_binance. Wow, this is awesome in so many ways! #HODL $BNB and just swipe a card when you spend. Best of both worlds!

Someone asked me about credit card withdrawals on the AMA, here you go.
#CarefulWhatYouWishFor with @Binance.

Thank you @SpendCard

cz_binance. First they ..., then they ..., then they..., then you win!

Welcome to the real world, JPM!

cz_binance. Can't argue, the XRP army is strong.

cz_binance. XRP purchasing using a credit card is working now. Slowly but surely.

cz_binance. Finally got a date. Targeting to release Binance Chain testnet (@binance_dex) for public testing on Feb 20th. This is a testnet, your feedback would be most valuable.

cz_binance. Apparently, I hold the torch now. #LNTrustChain

I must say, it feels very cool in my virtual hand. :) Who should I send it to next?

cz_binance. gotta keep shilling...

cz_binance. When markets do go back up that doesn't mean all projects will.

cz_binance. Not competition, just more choices. And growing the industry together. https://t.co/xtQ27caX6j

cz_binance. @origintokyo @ErikVoorhees @binance That's exactly what I thought back in 2013, ""damn, I am too late. I wish I started early like those other guys."" and I will say the same thing I heard back then. We are still early, the beginning of the beginning.

cz_binance. Many thanks to @CoinMarketCap for updating the $BNB circulating supply. Doing ranking is much much harder than people imagine. Keep up the good work!

cz_binance. Stay the course, keep building!

cz_binance. Happy Chinese New Year! The year of the Pig is for prosperity, luck, and health (lots of good food). Best wishes from the @Binance team! https://t.co/mmEO9VaMG5

cz_binance. Very important.

cz_binance. I guess simple math proves crypto have nothing to do with it.

cz_binance. For any internet (non-physical) based business, I don't understand why anyone would not accept crypto for payments. It is easier, faster and cheaper to integration than traditional payment gateways. Less paperwork. And reaches more diverse demographic and geography.

cz_binance. That's sad. There are many solutions to split private keys or signing to achieve 3/5, 5/7 etc. Never neglect security.

Also, never have CEO carry private keys. Bad on many levels.

Personally, in good health and intent to live longer and prosper. Thx for asking. Stay #safu.

cz_binance. Buy crypto with your credit card!

In our testing, Simplex does not support all credit cards, but do have a decent coverage. Good luck!

cz_binance. Find a solid project (10 year product, 100m users), advise them to keep the initial sale price low (overwhelming demand), then list (price goes up). Some say “manipulation” (what?!?) Some say “thank you!”. Welcome to the world of freedom!

cz_binance. The amount of security efforts going on in an exchange is not easy to imagine. Here is an example of @binance's big data AI system preventing a user who got SIM swapped, email and 2FA both hacked from losing his 46 BTC. stay #safu. https://t.co/NSb2lZIsld

cz_binance. Due to overwhelming demands, Tron team generously agreed to do a small airdrop for people who tried to place orders, but was not successful in buying. Exact numbers will be published soon.

cz_binance. @Binance_DEX Binance DEX will support hardware wallets from day one of launch. So that you can be sure you private keys never leave your device.

cz_binance. Another busy Sunday, relaunching Launchpad. Lots of stress testing, as the number of users have grown significantly since our last project. Less than 36 hours to go.

cz_binance. Many people talk to me assuming I know what the $BNB price is, fact is I often have to ask them where are we at, lol. Bear or bull, keeping building.

cz_binance. Consistently building, day in and day out, bear or bull.

cz_binance. Have to shill once in a while. #BNB https://t.co/MWt29JETBf

cz_binance. Singapore @binance Conference took about a month to organize, and ran relatively

smoothly (of course, with lots of areas to improve). Our team and partners worked tirelessly. Thank you so much!

Hire passionate people!

cz_binance. 5 bug guys.

cz_binance. Chance encounters, bumps into @rich_teo on airplane first, then see @dahongfei sitting right beside me. And customer officer excitedly telling all his colleagues to admire the cool Kialara physical bitcoin they found through the xray. https://t.co/jXHNoMGgmM

cz_binance. Thank you! I can't believe CCN makes articles/FUD this bad. The original Reddit post didn't even include Binance. CCN also admit they did not verify or see any stolen data. Irresponsible in-industry journalism. Disappointed!

cz_binance. Finally, we meet. @APompliano https://t.co/mSSHDuApcT

cz_binance. Getting started in a few minutes https://t.co/KRJ8UYVvSf

cz_binance. This is the day @Binance announced our Whitepaper, honored to be invited by NEO/ANT to their press conference to make the announcement. And Hongfei saying lots of good things supporting us. :)

Throw back to @binance's first tweet ever.

cz_binance. https://t.co/THxfdd3RD2 is overwhelmed with registrations. There is a backlog of KYC verifications already. More resources are allocated to reduce it. In the mean time, we appreciate your understanding and patience. The registration prize is FIFO based, no worries. Just crazy!

cz_binance. Just received from a friend. https://t.co/8UugT0eZHn

cz_binance. Just checked, we were able to freeze some of the funds. I don't understand why the hackers keep sending to Binance. Social media will be pretty fast to report it, and we will freeze it. It's a high risk maneuver for them.

cz_binance. https://t.co/uvOyDcWFjf

cz_binance. You asked for it, we listened.

AND worked hard in the background for all this time!

#BUIDL baby #BUIDL

cz_binance. GBP and EURO should be a big deal, right?

cz_binance. Maybe it's time for a new DEX. :)

cz_binance. Store coins yourself. You fight hackers yourself, and guard from losing wallet yourself. Computer breaks, USBs gets lost.

Store on an exchange. Only use the most reputable, proven secure, exchanges.

Or move to DEX, disrupt ourselves.

cz_binance. Not reading is a prime reason for being poor.

cz_binance. I feel a burning sensation. How about you? https://t.co/Uh7NPhfeiS

cz_binance. I heard many teams didn't go home last night. These are the builders. Not every project will successful, but they still contribute greatly to our industry. Without these, there will be no winners either. These are the builders!

cz_binance. Finally, wish came true, volatility in the right direction.

cz_binance. @Compass_Crypto @binance careful what you wish for. :)

cz_binance. Took a break for half a day, and am already bored. I can't do this (nothing) any longer.

cz_binance. I didn't think I would swear so early in the year, but oh well, there is a first time for everything.

cz_binance. Oh fk off already. Lol.

cz_binance. One problem with new years is that it's a different time in different parts of the world. It's a big world!

cz_binance. What are you doing for the last day of 2018?

cz_binance. My year end random thoughts. Hope you like it. Merry Christmas and Happy New Year! May 2019 be a moon year!

cz_binance. New pairs on #binance https://t.co/P53Rtbi1m5

cz_binance. We would like to thank TRX and XZC for supporting #Binance charity efforts.

Enjoy the holidays!

cz_binance. We will prioritize adding more pairs for the projects that have donated to our charity at this (even thought we never mentioned this during our fund raising efforts). Happy holidays!

cz_binance. @crypto_po yes, the ""base"" is called quote currency, to be correct. Google it.

cz_binance. We will be adding a couple trading pairs with XRP as the quote currency shortly.

And rename ETH markets to ALTS market. Running out of space on the UI.

Merry Xmas!

cz_binance. Just received this. https://t.co/Ilyr5inFXp

cz_binance. finally got the volatility I was hoping for, up wards, lol...

But don't let that change you, keep #buidl ing!

cz_binance. I like it, u?

cz_binance. Remember all the media coverage that was shilling blockchain/crypto, directly or indirectly encouraging people to invest, near the ATH, and are now bashing it. Wouldn't it make more sense if they did the reverse?

cz_binance. I will keep this one for future reference. https://t.co/Dc8ErOdnBx

cz_binance. Many people don't realize when they themselves have a narrow mind. When you work across real multiple cultures, you need to open your mind to a global view, and respect what the people involved prefer, not what you prefer in your culture.

Crypto will reduce the culture gaps.

cz_binance. In addition to these 3 girls (Head of Marketing, Labs, Charity) mentioned, at @Binance, the following roles are girls too: Head of Helpdesk, Head of Clearing, Head of Asia Marketing, Head of PR, Head of HR, Head of Operations Malta, and many other roles.

cz_binance. While many VCs have ""paused"", we are actually more comfortable investing now. Valuations are more reasonable, most have prototype/product, only strong teams left. Much better investment opportunities than at ATH.

cz_binance. @iamjosephyoung The court case may take years. But if XRP is ruled as a security, it would seriously hurt a lot of US users, and to a certain extent, other users around the world too. It certainly doesn't look like a security to me, but that's just one person's opinion.

cz_binance. Remember the time when @TimDraper bought the first batch of FBI auctioned Bitcoins at $700, then the market dropped to $350? Guess who is laughing now?

I am guessing most people panicking now are not old enough (in crypto) to remember this.

cz_binance. This came out of left field. Very interesting though. Paypal next? https://t.co/U2fixacrYv

cz_binance. I use a service that actively blocks and reports scammers on my twitter. I also block them myself. Do you guys still see many giveaway scammers in my tweets? If not, I will recommend them.

cz_binance. even the scammers haven't given up... [rofl]

cz_binance. Binancian marathon run. Life is a marathon. https://t.co/iBEMVEi7M9

cz_binance. What do you think will be the trigger for the next bull run?

(I get asked this question often, and honestly, I don't know the answer, other than keep building)

cz_binance. lol, that's hilarious. We focus on real building, not filing. I think I saw HODL somewhere first. I may or may not be the first one to use the BUIDL term. Can't remember, and not that important. ... But if they fk around with #SAFU, I will be pissed!

cz_binance. Three things about the @Binance_DEX

1. ONE SECOND block time, ONE confirmation finality = INSTANT TRANSACTIONS

2. You control your funds (private keys). No holding of coins at the exchange.

3. Simple UX, just like https://t.co/9rMMAmtCxH

cz_binance. #Malta leading the way.

cz_binance. I get asked often ""how did you get into bitcoin?"" this is the guy who first introduced me to bitcoin, and the rest is history. Thank you Bobby!

cz_binance. Be aware of scammers. Most of the 500+ “Binance employees” on LinkedIn are FAKE. Our listing team is not public on LinkedIn. We will never contact you first about listing applications.

Protect yourself from scammers: https://t.co/2V3FLs8MmM https://t.co/lF01UuW1dw

cz_binance. Adoption, slowly but surely.

cz_binance. Uncertainty = opportunity

cz_binance. FUD wins in the short term, BUIDL wins in the long term.

cz_binance. All good. Having HEDL through one of these will certainly make you remember how long it took, lol. Great infographic.

cz_binance. Blood bath every where. Shouldnt we be oppositely correlated to this?

cz_binance. Right, when you sell, someone else has to be buying. [smirk]

cz_binance. Many smart people have guessed correctly, one of the secrets of Binance's success is we have the strongest anti-fraud systems behind the scenes. You don't get big otherwise.

https://t.co/b1c49xy7z7

cz_binance. Despite the rough seas out there, builders are building. New releases on GitHub today from:

EOSIO
ZCash
BitShares
Cardano
Nano
Bitcoin-abc

(This is more than the usual we see from GitHub). Kudos!

cz_binance. too busy with work to tell that (lame) story in detail. Today is a busy day.

cz_binance. I wish I could tell you my lame story from 2015, when the $btc price ""crashed"" to below $200, and I just sold my house and bought in at $600 a few months earlier... Well, I am still here.

cz_binance. I can't tweet anymore. People always over-read them, into the ""deeper"" meanings, and stuff..., that I don't even know existed.

cz_binance. Crypto is not going away.

cz_binance. Just converted one more of our lawyers to take $btc for fees, even on a day like this.

cz_binance. been through this many times already. Secret of success? Keep your head down and build.

cz_binance. The xrp base shill is strong. Let's get it out of your system, and put all your shills under this one tweet, and let's see how much we get.

https://t.co/usiISCtuSj

cz_binance. Savage

cz_binance. Less possibility of confusion with bitcoin now.

cz_binance. One thing about the fork, these symbol names will stay. Binance will not support changing of trading symbols later. If anyone asks for it later, let's refer them back to this tweet.

cz_binance. Lol, laughing at my own tweet/stupid jokes...[joy]

cz_binance. I still prefer chopsticks, they coexist in parallel, and compliments each other.

cz_binance. Let's get this stupid fork over with already. I honestly don't like forks.

cz_binance. Now, 100% of the listing fee go to the 100% transparent blockchain charity @BinanceBCF, in this case, about $200,000 USD worth. Result: 1 destroys the myth around ""millions in listing fees"", 2 improves transparency, 3 coins gets listed, 4 charity get funded.

cz_binance. Upgrade commencing soon. Funds are #SAFU.

cz_binance. Sensational titles... [joy] I will say it, once and for all. There will be a bull run, followed by a bear run, then bull, and bear, and bull, and bear, and bull... If you say it quickly, it becomes BNB. lol.

cz_binance. Surprise surprise, they are coming

cz_binance. We now see Singapore, Taiwan, Japan, Korea and Hong Kong competing to be the blockchain hub in Asia. What do you think? I personally hope all of them success.

cz_binance. Love the night mode, u? https://t.co/I48i1IsIoS

cz_binance. This is a super interesting panel. The other panelists (and audience) are all very successful, rich and not-so-into-crypto-yet. Doing my job as a crypto salesman again.

cz_binance. Enabling #blockchain in Africa. @binance

cz_binance. What happens when a fund like Fidelity allocates a mere 5% of their portfolio to crypto? Have you calculated how much that is?

cz_binance. Nice, institutional money will enter sooner or later, just a matter of time.

cz_binance. We will be moving some funds between our cold wallets. A tell tale sign of a new cold wallet on Binance is two small transfers from and BACK TO an existing wallet, then a large transaction. No need to be alarmed. Funds are #SAFU.

cz_binance. ""Pump""kin. The only type of ""pump"" we encourage.

cz_binance. I want to thank all the #BinanceAngels and community members who helped us on a day like this. Supporting the hundreds of social groups, sites, communities cannot be done without you. Together, we can build a strong and healthy blockchain enabled future. [pray][pray][pray]

cz_binance. Blockchain/crypto is not going away. Then take a 5-10 year horizon, and think about where we will be. BUIDL/HODL to that!

cz_binance. Unknown to many, @Binance has the highest standard when it comes to combating fraud.

cz_binance. Not a small fund. https://t.co/J785D8gTWW

cz_binance. Learned today, short term, launching a fiat exchange that required months of work had less positive impact than FUD about USDT (a single photoshopped fake announcement) on BTC price. But I also know for a fact, long term, hard work wins. Keep building!

cz_binance. Instead of entering useless debates by talking, let's do stuff to prove them wrong, by creating value. Creating value wins in the end in most debates.

cz_binance. Back to listing. Ravencoin, no ICO, community project, humble people, no listing fee.

cz_binance. Many asked me: why did you choose Malta? listen to this 5 minute speech.
You may then ask yourself ""Should I move too? a country that openly states they COMPETE to attract my (blockchain) business?"" Arrive at your own answers. I will hold off on my totally biased opinions. :)

cz_binance. Afternoon meeting with Prime Minister @JosephMuscat_JM, and Jr Minister @SilvioSchembri of #Malta, the #BlockchainIsland. These guys have done so much for the blockchain industry. Thank you! https://t.co/EQLNgHWNFv

cz_binance. Manning the #Binance booth at #Malta #DELTASummit (which will start in 30 minutes). https://t.co/q6IHjIR3ae

cz_binance. Just had a productive meeting for #Binance #DEX (decentralized exchange), where $BNB will be native gas, and the exchange don't control user funds. Aiming for a public beta end of the year/early next year. Yes, we work on Saturdays, non stop!

cz_binance. Issue fixed now. Withdrawals resumed. Apologies for the interruption of service. Thank you for your understanding and support!

cz_binance. When you do things for the right reasons, you often get lucky.

cz_binance. Tokens are not securities in Singapore, nice! Progressive regulations will win the future. https://t.co/VxLHj4MUXN

cz_binance. Different views don't affect friendships. Our team ran into @VitalikButerin at a ""random"" coffee shop. He was very kind to take a photo with them. They tried to fool him to wear a Binance Cap, he was too smart to fall for it, haha. Good times! Trivia for a few years later.

cz_binance. From $0.003 in the first transaction of BTC in 2010, to $6000 support in 2018, BTC has grown 2,000,000 times in the last 7 years. Let's dare the crypto market will do 1/2000th of that in the next few years? 1000x.

cz_binance. Wow, that's more than the entire crypto market cap. https://t.co/vt4Mxw8kJB

cz_binance. learn, understand, believe.

cz_binance. The stars are aligned with meeting head of state this year. While watching the F1 race, Singapore Prime Minister Lee Hsien Loong walked by. And I sneaked in a fan photo. https://t.co/DZjWi6Jd1n

cz_binance. I just slipped that we will begin #Binance Singapore fiat exchange live money closed beta testing on Sept 18th, in 3 days. Invitation only first. Exciting!

cz_binance. A couple things. Meeting your own CFO is not easy with a distributed team constantly on the move. He was in Malta signing a significant securities exchange deal a day ago. Now in Singapore. Always go local on food. And I am beginning to like green. https://t.co/2AABBR3teb

cz_binance. I still disagree with this. I will say ""crypto will absolutely grow 1000x and more!"" Just reaching USD market cap will give it close to 1000x, (that's just one currency with severely restricted use case), and the derivatives market is so much bigger.

cz_binance. What!? Everyone heard of the internet in 2000 and how big was google, facebook, airbnb, uber, alibaba back then? Can't agree with that logic. Innovation will continue...

cz_binance. Stable coins are big bridges into crypto, good job! Let's see what happens to market cap in a few months/years.

cz_binance. A direct partnership with @MaltaStockExch. In the photo, Binance Head of Operations Mariana, @binance CFO Wei, Malta Finance Minister Edward Scicluna, Chairman of Malta Stock Exchange Joseph Portelli. Love the caps! https://t.co/kPOepn5cpL

cz_binance. I have yet to meet a person who understands blockchain but don't believe in it.

cz_binance. Truth time: are you a believer?

cz_binance. I have a feeling the first 10T company may be a crypto one.

cz_binance. Just came across this: ""God, grant me the serenity to accept the things I cannot change, courage to change the things I can, and wisdom to know the difference. "" —Reinhold Niebuhr 1934

cz_binance. fiat does not imply stable https://t.co/ad0CJYh2nA

cz_binance. Still got a long way to go

cz_binance. wow, honored. Don't worry, I think the cycle should be complete soon, given the mainstream news coverage of events. Understand blockchain and crypto is not going away, other than the non-believer speculators that was shaken out (they will come back), adoption is increasing.

cz_binance. 2017 Sept: BTC price $3000, FUD / negative news abound. 3 months later: BTC price $20,000.

cz_binance. Right now, all the top 100 coins on https://t.co/bdiC9MrmS9 are green. A rare, and happy occasion! Go #crypto!

cz_binance. I see 92 out of the top 100 coins on https://t.co/VP3Sss1icR are green [chart_with_upwards_trend] today, and with all top 50 green, no exception. There are bad days and there are good days. Don't be too emotional about it! https://t.co/DTIVHQhp3Y

cz_binance. Keep plowing ahead. Education is a fundamental pillar for mass adoption. I wish schools taught how not to follow the herd and buy at 20,000, then sell at 6,000. Life is much better doing the opposite.

cz_binance. I have a strange feeling the biggest one is in the 2nd half of the tweet. Time will tell, lol.

cz_binance. On this boring Sunday, I updated my personal #Binance listing tips again. This time, with more in depth view into listing fees, evaluation, and a few other random thoughts. https://t.co/usiISCtuSj

cz_binance. We don't list shitcoins even if they pay 400 or 4,000 BTC. ETH/NEO/XRP/EOS/XMR/LTC/ more listed with no fee. Question is not “how much does Binance charge to list?” but “is my coin good enough?” It’s not the fee, it's your project! Focus on your own project!

cz_binance. A first (rough, pre-alpha) demo of the Binance Decentralized Exchange (DEX), showing issuing, listing and trading of tokens. All cli based, no GUI yet. A small step for #BinanceChain, a big step for #binance. https://t.co/2aXkR0gclP

cz_binance. Real @binance partners never make single sided announcements, those who do never become one. Any claims of listing or partnership with Binance that do not originate from us should be considered FALSE. Don't invest in liars!

cz_binance. lol, thanks buddy!

cz_binance. Kudos to @CoinMarketCap for the new adjusted volume ranking! Thanks for maintaining balance and transparency in our community. Not an easy job! https://t.co/V62p99FtwZ

cz_binance. Excellent write up, must read! “Most Common Cryptocurrency Scams & How to Avoid Them” by Valore Initiative https://t.co/buaW7UY96i

cz_binance. A secure, easy to use, on-chain mobile wallet with full dapp support. The next gen mobile wallet begins. https://t.co/cSfaBOvBrA

cz_binance. ""Blockchain is no longer a career decision, it’s a life decision. I am gonna spend my life in this space."" - a job candidate (one that we will hire)

cz_binance. The year is not over yet. :) It seems people become geniuses around Sept-Xmas.

cz_binance. And reading FUD as news... https://t.co/G72UXeVnFC

cz_binance. thanks to @PundiXLabs for supporting BNB in their POS. One more utility, BNB payment on 5000+ POS this month, plus much more later. ""After seeing how this works in person, I am very bullish on this tech!"" https://t.co/IlsC56d75N

cz_binance. Security tokens, with support from @MaltaStockExch and @binance. There is usually more than one way to get something done.

https://t.co/3n51Jccrjt

cz_binance. $410,000 USD additional was raised in 60 donations in the last 7 days. There are some big hearts out there in crypto! Thank you for your generosity, and effort in making our little Earth a better place.

https://t.co/ga30ddMorS https://t.co/864zhQGFkJ

cz_binance. Binance Q4 Recap https://t.co/GNmIQUOo93

cz_binance. Malta is the fusion ground for traditional and blockchain finance now. A lot can happen in 3 short months. https://t.co/byUbqmUMN5

cz_binance. Got asked a few times, re: “Vitalik’s burn in hell”.

Let’s not wish others to ""burn in hell"". Let’s have a bigger heart, and appreciate the fact that we are part of an eco-system... https://t.co/4QYGKus0Gk

cz_binance. Just checked, btc price was $2500 a year ago, today $6800. Trading volume for btc was 780m a year ago, today is 3.4b. There you go. https://t.co/XxjF7iYhgQ

cz_binance. Our hearts go out to the victims in West Japan. @binance will begin with a $1,000,000 USD equivalent donation in either BNB, BTC, or JPY. We also ask our crypto partners to join us and help our friends in need.

cz_binance. Swiss trains are awesome. Ask your neighbors to imagine all train stations with no gates, absolutely none. Astonished? And you can pay with bitcoin. You still have to buy tickets, it’s an honor system. Self regulation. https://t.co/VGVDbwmbM7

cz_binance. Thanks buddy! Good to see you again in person for the last couple days. https://t.co/ykbtHwOMLP

cz_binance. If you have a chance to positively impact 1.2 billion people's lives (in Africa), how could you resist? Isn't that so much better than having 1.2 billion dollars? Many thanks to Sherman, a writer who understands crypto. https://t.co/O34D9KDPLE

cz_binance. #SAFU is real now. https://t.co/xIXC0YuEy6

cz_binance. Funds are safe. https://t.co/YKxVceCWua

cz_binance. There are plenty of money around, for people doing the right things, for the right reasons.

cz_binance. Exclusive for cointelegraph. First fiat exchange for #Binance. Not about profits, but about spreading crypto. https://t.co/zQ4grza6ui https://t.co/gWMXlgXhBp

cz_binance. Prepare for launch!

cz_binance. safuest! :) https://t.co/rfH8Z0aTyF

cz_binance. Issue fixed. Trading will resume in 30 min.

cz_binance. 1 month in crypto is like a year in traditional industries. During a system upgrade,

every second is like a year. Sorry that it took way longer than the test run, with the same data... https://t.co/55QcbaVCpz

cz_binance. Data migration will take a little longer than expected, again. Apologies for the extension.

cz_binance. A few exchanges listed BNB, without our involvement whatsoever. They want to attract our users. smart move. Large, targeted user base. It is also validation for BNB (good for us). Focus on product, exchanges have to list good coins. (Far better than shilling in my tweets)

cz_binance. Big upgrade. Funds are safu! https://t.co/1DV1sVpI93

cz_binance. Markets are never linear, nor follow any mathematically lines. That would take all the fun/excitement/pain/skills out of trading. Markets always over react, you should do the opposite! https://t.co/DTaR5OlpeC

cz_binance. A hammer that views everything as a nail, will end up destroying most of what isn't.

cz_binance. Today is the conception anniversary for @binance. Exactly one year ago today, around 11PM, we decided to do the ICO, and started writing the whitepaper from that hour. What a year! Thank you for all your support, past and future!

cz_binance. $66 trillion market cap for the world's top securities exchanges combined. Guess what the BTC price will be when these tokens take off? https://t.co/52v4taa5vm

cz_binance. I actually rarely shill our own coin, but you gotta let me do it once in a while, lol.

cz_binance. When the going gets tough, the tough gets going. https://t.co/6XJvUGC7YW

cz_binance. Many people seems to think BTC price was flat before this year, as they appear to be on the graph. To the old timers, it's the same pattern every year. Just the units on the left is different. https://t.co/mwu8U3jn0J

cz_binance. Another good VC friend of mine just said ""my industry is completely disrupted, money is no longer the bargaining chip, we are moving into crypto."" I said what I always say, ""welcome"".

cz_binance. https://t.co/bik2ZJfUED

cz_binance. Government of Malta works on Saturday for blockchain initiatives. How about yours? https://t.co/IIWNFh8xRf

cz_binance. New photo, lol. We have one more announcement coming soon. Stay tuned! https://t.co/ADPlLBGSyq

cz_binance. A couple photos to go with it. Very nice touch, many thanks! @MaltaStockExch https://t.co/YjDE3mvPYZ

cz_binance. Speaking of Italy, got stuck solid for 2 hours on the highway due to an accident (which made the news) ahead. People started to BBQ and play badminton on the highway. A civilization that know how to enjoy any circumstance. Kudos, and thanks for pumping btc price! https://t.co/iKdvN318o5

cz_binance. Good regulations are good, bad regulations are bad. Sound too simple, right? But I still constantly get asked, do you like “regulation”, as in one word/entity. Gotta look a little deeper.

cz_binance. First demo from a Binance Dexathon contestant. This is not a Binance official event, nor have we seen the demo or code ourselves yet; it is organized solely by the contestant. However, Binance will show our support by sponsoring pizza for the event. https://t.co/rG1LVY9SNa

cz_binance. One Earth, just many languages! https://t.co/xcmfS4un6D

cz_binance. We may soon require all projects applying to list on Binance to disclose if they have any direct or indirect relationships with Sequoia.

cz_binance. ICOs - Not Just “Good-to-Have,” But Necessary. https://t.co/JjG95qHlgp

cz_binance. Bermuda is beautiful! Taken a few days ago, from the air. https://t.co/kypyMMN2y8

cz_binance. Thanks to @alex_dreyfus for allowing #binance to use his studio in Malta. https://t.co/f1ZoDcdKjA

cz_binance. No pressure guys, let’s see who dares to be the last one to move. Haha https://t.co/VyiYPKtXWZ

cz_binance. Bermuda shorts are like bitcoin, many people still don't know, or have the wrong perception about it. It is formal and respectable. (honestly though, I didn't know until this trip, but I am an open minded learner). I now feel a even stronger tie to them.
https://t.co/G4IjBMrJkd

cz_binance. Some people ask me “which country are you…?” That’s a wrong question. A better one would be “which countries…?” Blockchain is a network, much like if you just have one telephone, it won’t work too well. Blockchain is for everyone!

cz_binance. The first Premier @BermudaPremier in a #binancehoodie. That’s reciprocal respect in fashion, customs and business. Respect! https://t.co/ClnvqsodBo

cz_binance. Bermuda Shorts is formal. It is comfortable and logical, much like the Bermuda's Virtual Currency Business Act that was passed yesterday. This is a historic moment. Thanks to @BermudaPremier (center) and his team, & Gabriel (left) for his massive silent contributions! https://t.co/VANPqOtIZx

cz_binance. It's a demonstration of our respect and willingness to comply to local customs and regulations. :) https://t.co/kHrLDmODXa

cz_binance. Going forward, I am inclined to only accept media interview requests from journalists who HODL some crypto. So that I don't have to repeatedly answer ""are bitcoins only used by drug lords?""

cz_binance. I learned most journalists are forbidden by their employers to hodl any crypto. Should they be forbidden to own fiat if they write about trade-wars? So now, we have journalists who have never done a single blockchain transaction writing/""teaching the public"" about blockchain.

cz_binance. Honoured sir! Amazed at how advanced Bermuda is in welcoming the blockchain industry! Strong leaders makes all the difference in the world. https://t.co/QA88U51H0L

cz_binance. Awesome! @SilvioSchembri https://t.co/1SWWh1auid

cz_binance. Honoured Sir! With your blessing, let’s together make a blockchain enabled Africa with less proverty, more jobs and a better economy. https://t.co/qFksUUWCek

cz_binance. Video of the Binance meeting with President of Uganda Mr. Yoweri Museveni https://t.co/iMax4Y2OKk

cz_binance. Bitcoin. Would any sane VC invest in a project “lead by a single unknown founder, plans to quit in a year, has a 9-page document with mostly math symbols, no marketing plan/budget, and is projected to have $200,000,000,000+ USD market cap in 10 years”? The crowd did, and made it.

cz_binance. Great meetings with leaders of Uganda. Blockchain is for everyone! https://t.co/547vl7N1Hq

cz_binance. I hear the team has built a broom, who wants it?

cz_binance. @binance will partner with @cryptosavannah @AggieKonde @HelenHaiyu to support Uganda's economic transformation and youth employment through blockchain, embracing the 4th industrial revolution. We will do this by creating thousands of jobs and bringing investments to Uganda.

cz_binance. While we can't predict the future, others keep attempting it on us. Both ""news"" are not accurate. We are working with banks (to potentially support fiat), but no plans for USD in the short term. No xvg or xpr involved. Be careful around predictive ""crystal ball"" news.

cz_binance. Received another special gift. One of our ico investors minted 7 pure gold physical Binance coins, as a “token” of appreciation for the teams hard work. Thank you for your support! https://t.co/LLwzFbtrgy

cz_binance. In the last 2 weeks, I am aware of 20+ large cap crypto projects confirm establishing/moving/investing in Malta. There are probably more that I am not aware of. Let's build a healthy and vibrant blockchain economy in Malta. https://t.co/1zXGcceutP

cz_binance. Bitcoin price history. https://t.co/sC3zCcp379

cz_binance. Justin knows where the party is. Welcome to Malta $tron. https://t.co/CX7qtsgOWU

cz_binance. Welcome to Malta! Now it's a party. https://t.co/2pbUkkoCV0

cz_binance. Honored, sir! Part of my original quote to Bloomberg that was left out of the article. ""Malta is very progressive when it comes to crypto and fintech. We think it is a good place for other crypto businesses to look into as well."" https://t.co/cBZJnEgUGk

cz_binance. No need to worry. Some negative news often turn out to be positive in the long term. Chinese have a proverb for this. New (often better) opportunities always emerge during times of change.

cz_binance. Nikkei showed irresponsible journalism. We are in constructive dialogs with Japan FSA, and have not received any mandates. It does not make sense for JFSA to tell a newspaper before telling us, while we have an active dialog going on with them.

cz_binance. Smart people notice everything. https://t.co/R6zCcVSyvf

cz_binance. Thanks for the compliments. We have another move to fight back against (attempted) thieves, soon. Stay tuned... https://t.co/EvOuVAgp6T

cz_binance. All good man! Drinks on me when we meet. https://t.co/br4vxMYZVi

cz_binance. But you are spreading fud. We will prove you wrong. https://t.co/QTuK6t2ZS3

cz_binance. It's a real honor to be on the cover. (I just wished the #binance logo wasn't ps'd out). it is a team effort (not just me), 20 years (not 6 months) in the making. Many thanks to Forbes team though. https://t.co/pg7jtmQQxf https://t.co/OTqxVtnorL

cz_binance. $40,000,000 USD, gone!

https://t.co/uJh7Xl2d3O
